EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

Catalogue number

- 72-001—**Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 per year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-002—**Employment and Payrolls**—Monthly—Price \$3.00 per year
(industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material)
- 72-003—**Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 per year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005—**Estimates of Labour Income**—Monthly—Price \$2.00 per year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006—**Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.00 per year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201—**Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-203—**Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204—**Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
(3) a distribution of wage-earners in a given range of hours worked in the survey week)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

CHART-I

AVERAGE HOURLY EARNINGS IN MANUFACTURING CANADA AND THE PROVINCES

REVIEW OF MAN-HOURS AND HOURLY EARNINGS

1945-62

In 1962, as in 1961, average hourly earnings in manufacturing were higher than in the preceding year throughout Canada in practically all industry divisions and their components, and in almost all areas for which data are published. An increase of 5 cents to \$1.88 represented a 2.7 p.c. rise in 1962 which was a percentage point lower than in 1961 and lower than in most years since 1948. Average weekly wages rose by 3.1 p.c. to \$76.55, partly as a result of an increase of 0.1 hours in the average work week to 40.7 hours. The 1962 increases in weekly wages and hours were slightly below the 1961 gains.

Durable Goods

In durable goods manufacturing, average hourly earnings were up by 2.5 p.c. during 1962 and the average work week increased by 0.3 hours. The lengthening of the work week contributed to a 3.3 p.c. rise in average weekly earnings. All industry groups in the division recorded gains in average earnings and hours. Overtime work at premium rates particularly in the automotive industries and higher wage rates in components of the iron and steel and non-ferrous metal groups were among the factors contributing to the increases in average earnings in durables. Higher overall levels of activity in the automotive and shipbuilding sub-divisions of transportation equipment, in the primary iron and steel and industrial machinery components of iron and steel, and in electrical apparatus and supplies also produced a strengthening effect on hours and earnings. These upward movements more than offset the effect of industrial disputes that occurred mainly in transportation equipment and non-metallic minerals. Some decline in employment of wage-earners was reported in non-ferrous metal products which registered small advances in average hourly and weekly earnings.

Non-Durable Goods

During 1962, the averages of hourly and weekly earnings rose by 3.0 p.c. and 2.5 p.c., respectively, while average weekly hours decreased slightly in

non-durable goods manufacturing. All industry groups in this division showed higher average earnings but a number recorded a moderately shorter work week. In the paper products group some overtime work and wage increases had a strengthening effect on average earnings despite the effect of industrial disputes in newspaper publishing in the United States on operations in Canadian paper mills during the year. Printing and publishing also recorded overtime work and wage increases. A generally higher level of activity in rubber products added to the upward movement of average earnings. On the other hand, increased numbers of wage-earners reported in textiles and clothing partly offset the upward trend as average earnings in these two industry groups are below the overall averages for non-durables.

Non-Manufacturing Industries

Average hourly earnings in mining were up by 2.3 p.c. during 1962, with weekly earnings increasing by a slightly higher percentage and weekly hours decreasing by 0.1 hours. A lower average of weekly hours in metal mining, reflecting decreases in iron and uranium, was offset by a longer work week in fuels. Employment fell off to some extent in coal mining and in the oil and natural gas group, lowering the effect of these sub-divisions on averages of earnings in mining as a whole. A slight decline in numbers of wage-earners in metal mining resulted mainly from decreases in uranium and gold mining.

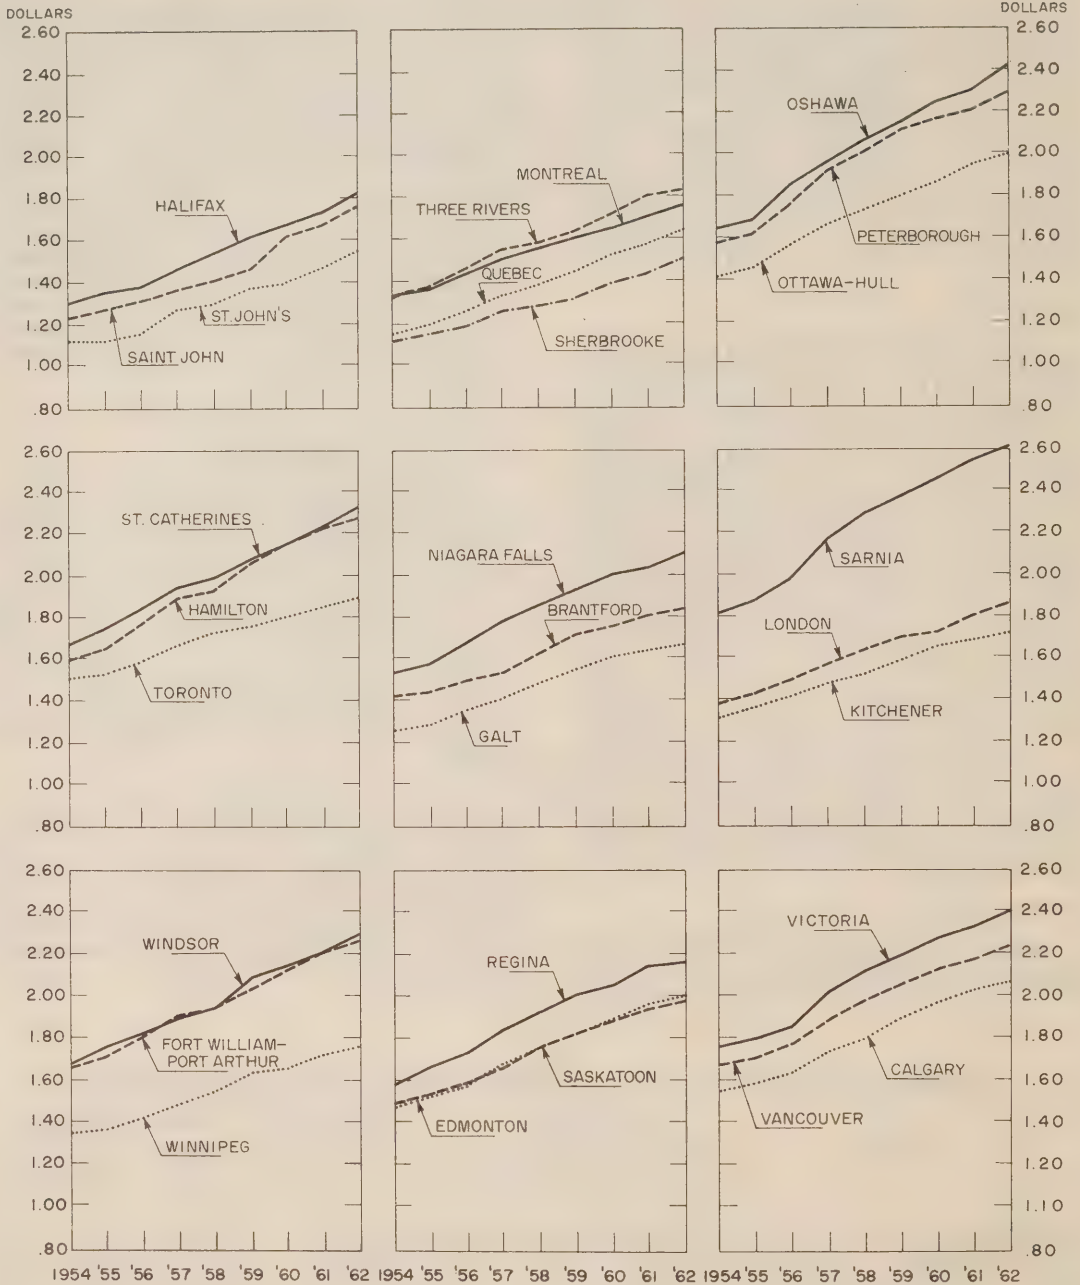

In construction, average hourly and weekly earnings increased by 4.0 p.c. while weekly hours remained at the 1961 level. Higher hours were reported in the highways, bridges and streets component, but a shorter work week was recorded in general engineering. Weekly hours in building construction were unchanged from 1961. Employment and hourly and weekly earnings were up in all three sub-divisions.

Average Earnings and Hours of Work, Industrial Divisions, Canada, 1945 and 1962

Industry	Hourly earnings			Weekly wages			Average weekly hours		
	1945	1962	Increase	1945	1962	Increase	1945	1962	Change

¹ Sum of monthly averages divided by 12.

² In this highly seasonal industry, an average of 12 monthly aggregates instead of 12 monthly averages gives an annual average of \$1.29 instead of \$1.34.

For footnotes (a) to (p) see notes on last page.

* Durable manufactured goods industries.

TABLE 7. Averages of Weekly Wages of Hourly-Rated Wage-Earners by Industry, Canada, by Months, 1962

Industry	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Average
	dollars												
Mining	92.19	90.82	91.28	90.83	91.72	92.04	91.57	91.27	91.34	92.18	92.57	86.85	91.22

Service (o)	38.1	38.3	38.4	38.2	38.4	38.6	38.6	38.4	37.8	37.9	38.0	37.0	38.1
Hotels and restaurants	38.3	38.5	38.3	38.0	38.2	38.2	38.4	38.2	37.2	37.6	37.8	37.4	38.0
Laundries and dry cleaning plants	39.0	39.3	40.2	40.3	40.5	40.5	40.2	40.2	40.5	40.3	40.1	37.3	39.9

For footnotes (a) to (p) see notes on last page.

1 In this highly seasonal industry, an average of 12 monthly aggregates instead of 12 monthly averages gives an annual average of 39.8 hours instead of 39.3.

* Durable manufactured goods industries.

TABLE 9. Average Hours and Earnings of Hourly-Rated Wage-Earners, Specified Industries, Canada, 1945-62

Year and month	All manufactures			Durable goods			Non-durable goods		
	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages

* The averages at these dates were affected by loss of working time at the year-end holidays in the case of December, and by the Easter holidays in the case of March, 1959 and April, 1962.

Note: Monthly statistics are based on data for the last pay periods of reporting establishments in each month.

Note: The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which the wages are spent. A statement of uses and limitations of the adjusted figures appears on page 46.

For Consumer Price Index Statistics, construction methods and component details, see monthly report "Prices and Price Indexes".

NOTES

General.—The monthly statistics of average hours, average hourly earnings and average weekly wages, like those of employment, payrolls and average weekly wages and salaries, are based on data from establishments usually employing 15 persons and over. The latest monthly figures are subject to revision.

Coverage.—Firms are asked to furnish information for the male and female wage-earners for whom they keep records of hours worked, so that the statistics relate, in the main, to hourly-rated wage-earners, or production workers, employed full time and part time. Casual workers are also included, provided that they work at least one day in the reported pay period. Data for salaried personnel are purposely excluded. In many cases, information is not available for certain classes of wage-earners, whose earnings, like those of most salaried employees, are not directly dependent on the number of hours worked; examples of wage-earners frequently excluded are route-drivers, piece-workers in many but not all establishments, truck men, etc. Numerous employers do not keep records of man-hours for any classes of employees. The number of workers for whom information is given in the present report is therefore smaller than the total number of workers (wage-earners and salaried employees) for whom statistics of employment, payrolls, average earnings, sex distribution, etc., are given in the monthly reports on employment and payrolls. These also include figures for certain industries not represented in the present report because relatively few of the wage-earners therein are paid on an hourly basis with the result that man-hour records are lacking. Such industries include public utility operation, trade, finance, insurance and real estate and some branches of transportation, storage and communication and service.

In manufacturing, the data relate to over 71 p.c. of all employees on the staffs of the firms co-operating in the monthly surveys of employment and payrolls; in 1957, the wage-earners for whom information on man-hours was obtained formed some 83 p.c. of the total number of hourly-rated and other wage-earners reported by practically all manufacturing establishments to the Annual Census of Manufactures. In mining and construction, data on man-hours and hourly earnings are provided for approximately 75 p.c. and 69 p.c. of the total employees of firms co-operating in the monthly surveys of employment and payrolls in those industries, respectively; in 1957, the monthly statistics were based on approximately 93 p.c. of the total number of wage-earners reported in the annual survey of the Mineral Statistics Section of the Industry and Merchandising Division.

Man-hours.—The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked; premium or penalty hours credited for purpose of computing overtime payment are not included. Hours

credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked. The averages are obtained by dividing the aggregate hours reported for the week by the number of full-time and part-time wage-earners working such hours.

Wages.—The questionnaire calls for a statement of gross wages earned by the full-time and part-time wage-earners whose hours are reported, before deductions are made for taxes, unemployment insurance contributions, etc. Payments for overtime work, incentive or production and cost-of-living bonuses paid at regular intervals, and amounts credited to wage-earners on leave with pay in the reported pay periods are included. The value of board and lodging, which in some cases is part of the remuneration of workers, is not included. Bonuses paid at infrequent intervals and employers' contributions to welfare funds such as workmen's compensation, unemployment insurance, pension and medical plans and certain other employee benefits are also excluded.

So far as is possible the revised figures of average hourly and weekly earnings incorporate retroactive pay for one month as well as corrections in the material originally tabulated and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

Pay Periods.—Statistics of man-hours and wages reported for periods exceeding one week in duration are reduced by the appropriate proportions to obtain the number of hours and the wages for one week in the stated pay period. Such data are combined with weekly figures furnished by employers whose records are maintained on a weekly basis, so that, in all cases, the tabulated statistics represent the situation in one week in each month.

Variations in Trends of average earnings result from many factors, such as changes in wage rates, in amounts of overtime work, short-time work, shift differentials, incentive or production bonuses and in the area, occupational and sex distributions of the reported working forces. Differences in industrial distributions, with related occupational and sex distributions, are the principal factors contributing to differences in the levels of earnings in particular areas.

Urban Area Statistics.—Statistics given in the present report for communities listed as "metropolitan areas" and "other major urban areas" in Tables 8 and 9 of the 1956 Census Volume 1 (Population) and in the same tables in Bulletin 1-6, cover the census areas, except those for St. Catharines, which also include establishments in Port Colborne and Welland. Statistics given for urban areas **not** listed in the above mentioned tables cover establishments in the incorporated cities and towns named but also include Iberville with St. Jean, Nitro with Valleyfield, and Preston with Galt.

Measuring the Purchasing Power of Earnings. —

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of weekly average wages rises from \$50.00 in week A to \$60.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10 per cent rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 20 per cent rise from \$50.00 to \$60.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$60.00 by the amount of the consumer price increase. The adjusted average is \$54.55 ($60.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$50.00 and the week B figure of \$54.55. Taking the week A average of \$50.00 as equal to 100.0, the week B index becomes 109.0 ($54.55/50.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 9 per cent more goods and services than those received in week A, in spite of a 10 per cent rise in consumer prices. This 9 per cent increase in real wages compares with the rise of 20 per cent in money wages ($60.00/50.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applic-

ability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using a price index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax, pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

In Table 13, 1949 figures are used as reference levels for indexes of both actual and real wages, since this is the year selected by the Dominion Bureau of Statistics for general post-war index number comparisons. However, the adjustment made in the foregoing illustration can be applied to any reference level, and it should not be inferred that the 1949 reference period has any special validity for earnings comparisons. Percentage change between any two periods will be the same regardless of the reference period selected.

FOOTNOTES

The following footnotes explain the content of various industrial classes listed in the detailed tables in this bulletin. In some industries, the group breakdown is less extensive than in the Standard

Industrial Classification; in these cases, figures for certain categories not shown are contained in the group totals.

- (a) Alluvial gold and auriferous quartz mining.
- (b) Copper-gold-silver; iron; nickel-copper; silver-cobalt; silver-lead-zinc; uranium and miscellaneous metal mining.
- (c) Oil and natural gas; oil shale and bituminous sand; contract drilling and prospecting for oil.
- (d) Non-metal mining and quarrying; clay and sand pits.
- (e) Tires, tubes and other rubber products.
- (f) Leather gloves and mittens; leather tanneries and miscellaneous leather products.
- (g) Miscellaneous wood products.
- (h) Paper boxes and bags; roofing papers; miscellaneous paper products.
- (i) Household, office and store machinery; machine tools; machinery, n.e.c.
- (j) Machine tools; machinery, n.e.s.
- (k) Jewellery and silverware; white metal alloys; miscellaneous non-ferrous metal products.
- (l) Abrasives; asbestos; hydraulic cement; clay; glass; lime and gypsum; stone; concrete and miscellaneous non-metallic mineral products.
- (m) Building includes buildings and structures, special trade contractors. General engineering includes other construction, other than highways, bridges and streets.
- (n) Interurban bus and coach and urban and suburban transportation systems; taxi-cab and truck transportation; services incidental to transportation; other transportation.
- (o) Hotels and restaurants; laundries; dyeing, cleaning and pressing plants, and recreational services.
- (p) The Northwest Territories, with the exception of Baffin Island, are included in Alberta. Baffin Island is included in Quebec. The Yukon Territory is included in British Columbia.
- (..) Figures not available.
- (-) Amount too small to be expressed.
- (-) Nil or zero.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

Catalogue number

- 72-001—**Advance Statement on Employment and Weekly Earnings**—Monthly—Price \$1.00 a year
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-002—**Employment and Payrolls**—Monthly—Price \$3.00 a year
(industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material)
- 72-003—**Man-Hours and Hourly Earnings**—Monthly—Price \$3.00 a year
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005—**Estimates of Labour Income**—Monthly—Price \$2.00 a year
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006—**Hiring and Separation Rates in Certain Industries**—Semi-Annual—Price \$1.00 a year
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201—**Review of Employment and Payrolls**—Annual—Price \$1.00
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-203—**Earnings and Hours of Work in Manufacturing**—Annual—Preliminary Report—Price 25 cents
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204—**Earnings and Hours of Work in Manufacturing**—Annual—Final Report—Price 75 cents
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
(3) a distribution of wage-earners in a given range of hours worked in the survey week)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

CHART - I

AVERAGE HOURLY EARNINGS IN MANUFACTURING CANADA AND THE PROVINCES

REVIEW OF MAN-HOURS AND HOURLY EARNINGS

1945-63

The post-war rise in average hourly earnings continued during 1963. The over-all upward movement of earnings was strengthened by a shift in employment in favour of the high-wage durable goods industries with the result that average hourly earnings in manufacturing rose by 7 cents to \$1.95. This represents an increase of 3.7 p.c. and is higher, both in absolute and in percentage terms, than increases in any year since 1957. The higher average hourly earnings together with 0.1 hours longer average weekly hours resulted in a \$2.85 rise in average weekly wages, the biggest gain since 1959.

Durable Goods

A 3.4 p.c. increase in average hourly earnings in 1963 and 0.1 hours longer average weekly hours raised average weekly wages by \$3.23 in durable goods manufacturing. Average hourly earnings rose in all the component industry groups. The significance of the change in average weekly hours derives primarily, not from the relatively small size of this change, but rather from the relationship between wage rates in particular industries and changes in average weekly hours in these industries. Thus, longer hours were worked in transportation equipment and non-ferrous metals where rates are above the durables average, and shorter hours in electrical apparatus and supplies at lower-than-average rates. Employment changes, on the other hand, were diversified in their effects on average hourly earnings. Employment increased in the high-wage iron and steel and transportation equipment industries; but it also increased in wood products and in electrical apparatus and supplies where earnings are lower than average.

Non-Durable Goods

In non-durable goods manufacturing, average hourly earnings rose by 3.5 p.c. to \$1.79 in 1963. All industry groups in this division registered higher average hourly earnings. This increase is higher than in the two preceding years but slightly lower than the average in the post-war period. Average weekly wages were \$71.90 for a gain of 3.4 p.c., and average weekly hours were 0.1 hours longer. Factors which tended to raise earnings

such as overtime and wage increases were supported by longer hours or more employment in industries paying above-average rates as, for example, in rubber, paper products and chemicals. Shorter hours or less employment in food and beverages and leather products, industries paying lower-than-average rates, also contributed to higher average hourly earnings. On the other hand, more employment in miscellaneous manufacturing, clothing and textiles, where many women are employed and earnings are below average, limited the amount of wage rate increases in non-durable goods manufacturing.

Non-Manufacturing Industries

In 1963, wage changes in different industries were more uniform in size than in the 1955-56 period of economic expansion. To the extent to which wage changes reflect general economic conditions, the current expansion is broadly based and affects manufacturing, mining, construction, transportation and services to a similar degree. This is in sharp contrast to the 1955-56 boom which was mainly based on investment, particularly investment in natural resource development and construction, and was characterized by wide variations in the size of wage changes from industry to industry in conformity with economic conditions in these industries.

In mining, average hourly earnings were up 2.8 p.c. in 1963, the biggest gain since 1959. Weekly wages rose by 3.2 p.c. and average weekly hours were 0.3 hours longer. Higher earnings in all groups of the mining industry and longer hours at high rates of pay in oil and natural gas were only partially offset by shorter hours of less employment in high-wage asbestos and metal mining and by longer hours at below-average rates of pay in coal mining.

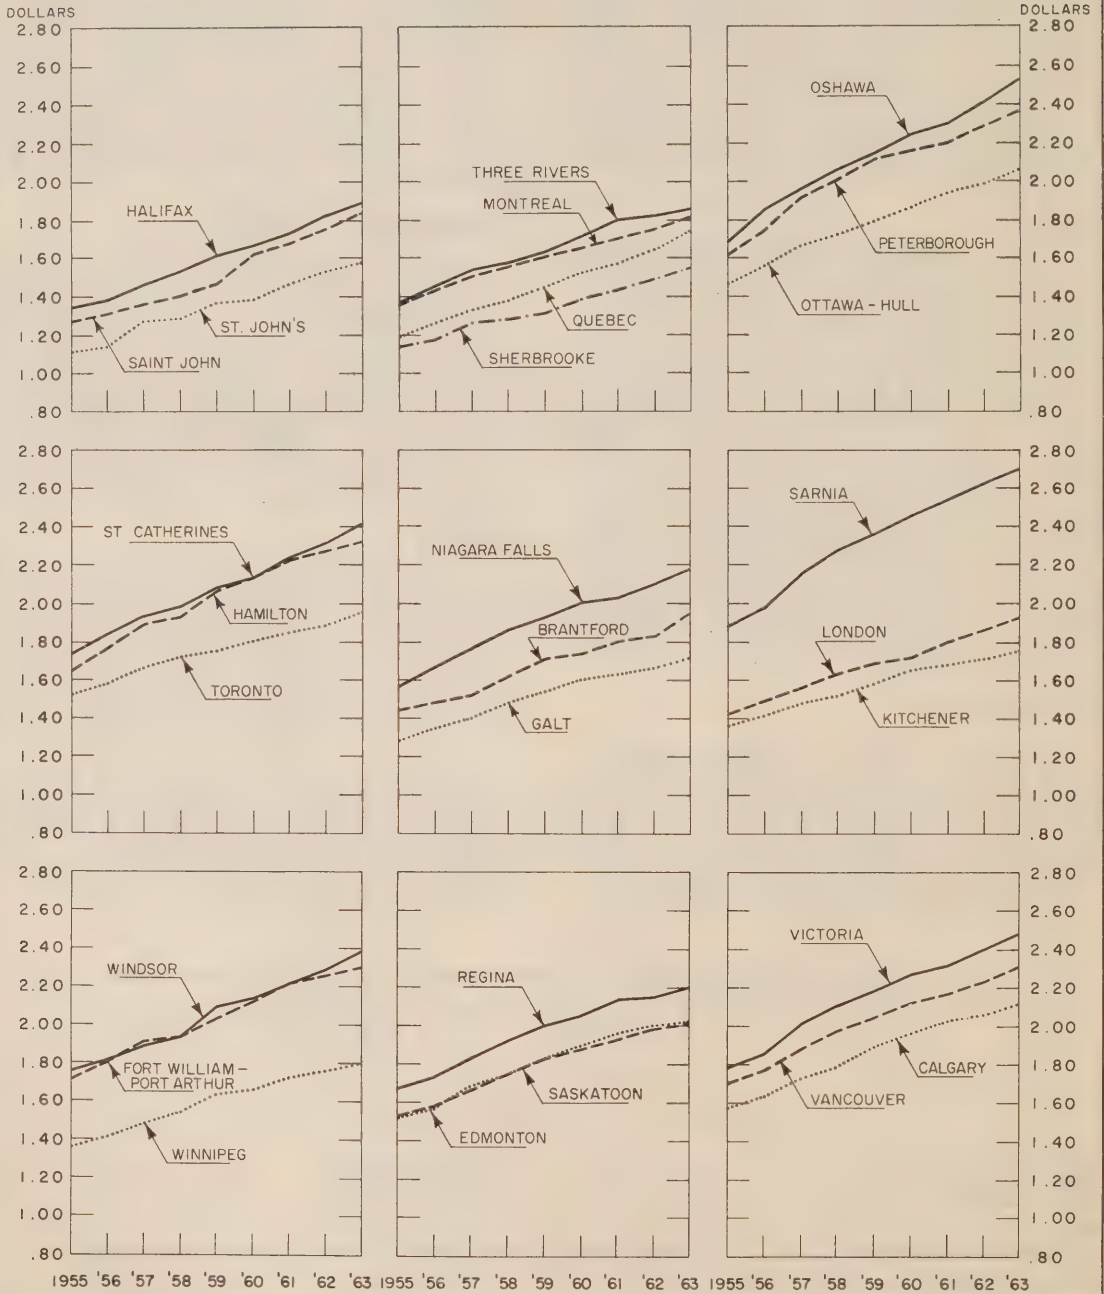

In 1963, as in 1962, average hourly earnings in construction increased by 3.9 p.c. Gains in average hourly earnings in all subsections of the construction industry and more employment at high rates of pay in building and general engineering were partly counterbalanced by longer average weekly hours at below-average rates of pay in highway construction.

Average Earnings and Hours of Work, Industrial Divisions, Canada, 1945 and 1963

Industry	Hourly earnings			Weekly wages			Average weekly hours

TABLE 7. Averages of Weekly Wages of Hourly-Rated Wage-Earners by Industry, Canada, by Months, 1963 - Concluded

Industry	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Average (q)
	dollars												
Manufacturing — Concluded:													
*Iron and steel products	91.51	91.99	92.05	93.57	94.16	93.17	93.12	93.24	94.42	93.86	93.87	87.55	92.73
Agricultural implements	98.47	99.53	100.43	100.03	99.92	96.34	96.12	92.37	93.46	93.95	96.43	87.06	96.35
Boilers and plate work	79.07	79.95	81.11	82.90	81.35	84.53	86.33	87.45	86.64	84.09	83.53	79.40	88.29
Fabricated and structural steel	88.00	90.65	88.53	89.42	90.76	93.22	91.85	90.67	95.93	93.93	92.76	85.03	90.95
Hardware and tools	78.80	79.60	80.31	80.55	80.68	80.46	79.94	79.03	80.31	79.88	80.10	75.68	79.61
Heating and cooking appliances	75.39	76.03	76.20	73.83	75.54	78.57	76.01	77.41	81.29	82.10	80.43	69.28	76.95
Iron castings	87.57	88.98	89.14	88.71	90.18	88.18	88.87	89.73	89.25	90.49	91.14	79.05	88.44
Machinery (i)	87.01	87.78	86.62	88.58	88.37	87.87	87.41	86.95	90.39	90.05	90.37	82.78	87.86
Household, office and store	87.17	86.48	86.01	87.27	87.38	88.09	87.36	86.88	90.63	91.78	89.83	79.45	87.37
Industrial (j)	86.96	88.18	86.81	88.96	88.66	87.80	87.43	86.97	90.32	89.54	90.53	53.82	88.01
Primary iron and steel	106.55	105.73	106.30	109.65	110.66	108.81	109.73	108.81	109.03	107.63	107.69	107.38	108.19
Sheet metal products	86.59	87.00	88.91	90.02	90.22	90.99	90.71	92.51	90.55	89.00	87.58	79.32	88.74
Wire and wire products	90.97	89.03	90.23	91.68	91.94	92.74	91.16	94.12	95.06	93.29	95.55	89.85	92.17
*Transportation equipment	94.83	92.88	94.80	98.85	98.28	94.50	90.66	92.04	96.95	98.29	105.50	94.35	96.18
Aircraft and parts	91.48	92.62	90.89	89.44	91.64	91.08	90.58	92.65	93.22	97.68	97.91	91.23	92.59
Motor vehicles	113.58	105.16	111.49	120.88	117.69	107.24	112.43	103.14	111.42	114.35	132.49	112.44	114.01
Motor vehicle parts and accessories	93.70	91.61	92.28	95.95	95.13	89.00	85.97	90.08	95.11	94.21	103.25	91.70	93.38
Railroad and rolling stock equipment	83.57	86.22	86.23	84.96	85.35	87.80	85.77	84.12	88.05	87.85	88.36	87.74	86.36
Shipbuilding and repairing	86.79	86.08	97.94	94.16	93.75	93.25	91.07	91.41	92.32	92.33	92.55	79.37	90.17
*Non-ferrous metal products	88.78	88.51	88.52	90.87	90.16	91.56	91.83	91.43	91.51	92.19	92.02	91.90	90.81
Aluminum products	81.17	82.58	82.36	83.65	83.01	83.01	84.43	82.91	83.97	85.35	84.52	79.34	83.06
Brass and copper products	87.02	86.33	85.68	86.75	86.44	87.29	89.37	90.60	89.75	90.72	92.08	83.87	88.04
Smelting and refining	97.70	97.41	97.24	100.17	99.37	101.52	101.26	100.90	101.01	101.23	100.45	106.14	100.40
Other non-ferrous metal products (k)	67.08	66.53	67.50	69.35	68.26	68.62	67.61	67.06	68.41	69.80	70.79	62.67	67.82
*Electrical apparatus and supplies	78.91	78.12	77.87	78.85	79.07	79.54	79.10	79.15	81.40	80.98	80.87	76.54	79.21
Heavy electrical machinery and equipment	88.67	87.60	86.56	87.01	89.63	90.29	89.31	88.02	91.98	91.48	92.06	86.95	89.13
Telecommunication equipment	69.50	68.34	68.77	69.55	69.75	69.69	69.45	70.73	71.70	71.15	70.81	67.66	69.77
Batteries	82.29	79.80	78.76	78.92	77.12	77.76	76.66	80.44	82.24	83.67	80.37	79.58	79.88
Refrigerators, vacuum cleaners and appliances	81.35	81.41	81.75	82.85	80.86	82.32	82.47	81.67	83.06	82.26	81.88	76.62	81.53
Wire and cable	92.45	88.62	89.31	90.46	91.59	91.23	95.19	91.78	96.23	93.63	93.46	85.91	91.69
Miscellaneous electrical products	84.30	74.82	74.23	75.52	74.74	75.27	73.58	74.80	76.81	77.30	77.42	73.10	75.16
*Non-metallic mineral products(l)	82.28	81.83	82.97	84.25	85.93	86.12	85.59	86.69	87.50	88.88	88.21	79.74	85.14
Clay products	75.41	75.03	74.55	76.80	76.79	76.51	74.96	75.09	77.03	77.52	76.79	68.95	75.53
Glass and glass products	81.93	81.03	81.62	83.22	82.11	82.03	80.06	81.44	81.64	83.73	86.57	82.64	82.31
Products of petroleum and coal	113.36	111.42	112.47	114.54	114.62	116.63	114.27	113.43	116.16	119.30	116.22	118.67	115.06
Petroleum refining and products	114.49	112.40	113.51	115.89	116.05	118.38	115.83	115.01	117.76	121.33	117.55	119.89	116.48
Chemical products	87.34	87.53	88.64	90.65	88.73	89.21	89.10	87.63	89.96	90.93	89.79	89.74	89.12
Medicinal and pharmaceutical preparations	66.24	67.37	66.62	67.93	66.81	68.09	67.56	67.11	68.43	68.13	69.01	66.54	67.50
Acids, alkalis and salts	101.00	101.02	101.92	104.02	100.88	101.96	101.28	97.66	102.87	106.36	102.67	106.31	102.32
Fertilizers	90.51	87.85	88.65	93.85	92.58	88.26	91.39	89.90	93.95	98.09	93.35	93.75	91.88
Paints and varnishes	79.56	80.93	83.02	83.41	83.28	82.89	81.00	80.81	82.56	81.69	81.59	78.70	81.66
Miscellaneous manufacturing industries	65.60	65.96	65.81	66.07	66.23	65.82	65.27	65.99	65.98	66.24	66.58	62.95	65.72
Professional and scientific equipment	77.93	78.45	78.75	79.65	78.86	78.31	78.22	79.30	80.32	82.73	82.82	77.96	79.43

For footnotes (a) to (q) see notes on last page.

¹ In this highly seasonal industry, an average of 12 monthly averages instead of 12 monthly aggregates gives an annual average of 38.9 hours instead of 39.3

* Durable manufactured goods industries.

TABLE 9. Average Hours and Earnings of Hourly-Rated Wage-earners, Specified Industries, Canada, 1945-63

Year and month	All manufactures			Durable goods			Non-durable goods		
	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages

Note: The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which the wages are spent. A statement of uses and limitations of the adjusted figures appears on page 46.

For Consumer Price Index Statistics, Construction methods and component details, see monthly report "Prices and Price Indexes".

NOTES

General.—The monthly statistics of average hours, average hourly earnings and average weekly wages, like those of employment, payrolls and average weekly wages and salaries, are based on data from establishments usually employing 15 persons and over. The latest monthly figures are subject to revision.

Coverage.—Firms are asked to furnish information for the male and female wage-earners for whom they keep records of hours worked, so that the statistics relate, in the main, to hourly-rated wage-earners, or production workers, employed full time and part time. Casual workers are also included, provided that they work at least one day in the reported pay period. Data for salaried personnel are purposely excluded. In many cases, information is not available for certain classes of wage-earners, whose earnings, like those of most salaried employees, are not directly dependent on the number of hours worked; examples of wage-earners frequently excluded are route-drivers, piece-workers in many but not all establishments, truck men, etc. Numerous employers do not keep records of man-hours for any classes of employees. The number of workers for whom information is given in the present report is therefore smaller than the total number of workers (wage-earners and salaried employees) for whom statistics of employment, payrolls, average earnings, sex distribution, etc., are given in the monthly reports on employment and payrolls. These also include figures for certain industries not represented in the present report because relatively few of the wage-earners therein are paid on an hourly basis with the result that man-hour records are lacking. Such industries include public utility operation, trade, finance, insurance and real estate and some branches of transportation, storage and communication and service.

In manufacturing, the data relate to over 71 p.c. of all employees on the staffs of the firms co-operating in the monthly surveys of employment and payrolls; in 1957, the wage-earners for whom information on man-hours was obtained formed some 83 p.c. of the total number of hourly-rated and other wage-earners reported by practically all manufacturing establishments to the Annual Census of Manufactures. In mining and construction, data on man-hours and hourly earnings are provided for approximately 75 p.c. and 69 p.c. of the total employees of firms co-operating in the monthly surveys of employment and payrolls in those industries, respectively; in 1957, the monthly statistics were based on approximately 93 p.c. of the total number of wage-earners reported in the annual survey of the Mineral Statistics Section of the Industry and Merchandising Division.

Man-hours.—The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked; premium or penalty hours credited for purpose of computing overtime payment are not included. Hours

credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked. The averages are obtained by dividing the aggregate hours reported for the week by the number of full-time and part-time wage-earners working such hours.

Wages.—The questionnaire calls for a statement of gross wages earned by the full-time and part-time wage-earners whose hours are reported, before deductions are made for taxes, unemployment insurance contributions, etc. Payments for overtime work, incentive or production and cost-of-living bonuses paid at regular intervals, and amounts credited to wage-earners on leave with pay in the reported pay periods are included. The value of board and lodging, which in some cases is part of the remuneration of workers, is not included. Bonuses paid at infrequent intervals and employers' contributions to welfare funds such as workmen's compensation, unemployment insurance, pension and medical plans and certain other employee benefits are also excluded.

So far as is possible the revised figures of average hourly and weekly earnings incorporate retroactive pay for one month as well as corrections in the material originally tabulated and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

Pay Periods.—Statistics of man-hours and wages reported for periods exceeding one week in duration are reduced by the appropriate proportions to obtain the number of hours and the wages for one week in the stated pay period. Such data are combined with weekly figures furnished by employers whose records are maintained on a weekly basis, so that, in all cases, the tabulated statistics represent the situation in one week in each month.

Variations in Trends of average earnings result from many factors, such as changes in wage rates, in amounts of overtime work, short-time work, shift differentials, incentive or production bonuses and in the area, occupational and sex distributions of the reported working forces. Differences in industrial distributions, with related occupational and sex distributions, are the principal factors contributing to differences in the levels of earnings in particular areas.

Urban Area Statistics.—Statistics given in the present report for communities listed as "metropolitan areas" and "other major urban areas" in Tables 8 and 9 of the 1956 Census Volume 1 (Population) and in the same tables in Bulletin 1-6, cover the census areas, except those for St. Catharines, which also include establishments in Port Colborne and Welland. Statistics given for urban areas **not** listed in the above mentioned tables cover establishments in the incorporated cities and towns named but also include Ithaca with St. Jean, Nitro with Valleyfield, and Preston with Galt.

Measuring the Purchasing Power of Earnings. —

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of weekly average wages rises from \$50.00 in week A to \$60.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10 per cent rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 20 per cent rise from \$50.00 to \$60.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$60.00 by the amount of the consumer price increase. The adjusted average is \$54.55 ($60.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$50.00 and the week B figure of \$54.55. Taking the week A average of \$50.00 as equal to 100.0, the week B index becomes 109.0 ($54.55/50.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 9 per cent more goods and services than those received in week A, in spite of a 10 per cent rise in consumer prices. This 9 per cent increase in real wages compares with the rise of 20 per cent in money wages ($60.00/50.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applic-

ability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using a price index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax, pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

In Table 13, 1949 figures are used as reference levels for indexes of both actual and real wages, since this is the year selected by the Dominion Bureau of Statistics for general post-war index number comparisons. However, the adjustment made in the foregoing illustration can be applied to any reference level, and it should not be inferred that the 1949 reference period has any special validity for earnings comparisons. Percentage change between any two periods will be the same regardless of the reference period selected.

FOOTNOTES

The following footnotes explain the content of various industrial classes listed in the detailed tables in this bulletin. In some industries, the group breakdown is less extensive than in the Standard

Industrial Classification; in these cases, figures for certain categories not shown are contained in the group totals.

- (a) Alluvial gold and auriferous quartz mining.
- (b) Copper-gold-silver; iron; nickel-copper; silver-cobalt; silver-lead-zinc; uranium and miscellaneous metal mining.
- (c) Oil and natural gas; oil shale and bituminous sand; contract drilling and prospecting for oil.
- (d) Non-metal mining and quarrying; clay and sand pits.
- (e) Tires, tubes and other rubber products.
- (f) Leather gloves and mittens; leather tanneries and miscellaneous leather products.
- (g) Miscellaneous wood products.
- (h) Paper boxes and bags; roofing papers; miscellaneous paper products.
- (i) Household, office and store machinery; machine tools; machinery, n.e.c.
- (j) Machine tools; machinery, n.e.s.
- (k) Jewellery and silverware; white metal alloys; miscellaneous non-ferrous metal products.
- (l) Abrasives; asbestos; hydraulic cement; clay; glass; lime and gypsum; stone; concrete and miscellaneous non-metallic mineral products.
- (m) Building includes buildings and structures, special trade contractors. General engineering includes other construction, other than highways, bridges and streets.
- (n) Interurban bus and coach and urban and suburban transportation systems; taxi-cab and truck transportation; services incidental to transportation; other transportation.
- (o) Hotels and restaurants; laundries; dyeing, cleaning and pressing plants, and recreational services.
- (p) The Northwest Territories, with the exception of Baffin Island, are included in Alberta. Baffin Island is included in Quebec. The Yukon Territory is included in British Columbia.
- (q) Averages in 1963 were derived from the aggregates. In seasonal industries, averages derived by the former method of averaging monthly averages can be supplied upon request. Differences are minor.
- (..) Figures not available.
- (--) Amount too small to be expressed.
- (-) Nil or zero.

EMPLOYMENT AND EARNINGS REPORTS

Following are other publications of the Labour Division based upon establishment data in the field of industrial employment, earnings and hours:

Catalogue number

- 72-001—Advance Statement on Employment and Weekly Earnings—Monthly—Price \$1.00 a year**
(index numbers of employment and averages of weekly wage and salary statistics for Canada (major industrial divisions) and the provinces (industrial composite figures))
- 72-002—Employment and Payrolls—Monthly—Price \$3.00 a year**
(industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material)
- 72-003—Man-Hours and Hourly Earnings—Monthly—Price \$3.00 a year**
(industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material)
- 72-005—Estimates of Labour Income—Monthly—Price \$2.00 a year**
(monthly or quarterly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1951)
- 72-006—Hiring and Separation Rates in Certain Industries—Semi-Annual—Price \$1.00 a year**
(data for establishments having one or more employees covered by unemployment insurance and employing ten or more persons; also all units of chain or multiple firms, with at least one insured employee, regardless of number employed)
- 72-201—Review of Employment and Payrolls—Annual—Price \$1.00**
(industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material)
- 72-203—Earnings and Hours of Work in Manufacturing—Annual—Preliminary Report—Price 25 cents**
(separate figures of earnings and hours for men and women and for wage-earners and salaried employees in one week in autumn for major manufacturing industries, Canada, and manufacturing in provinces and larger metropolitan areas)
- 72-204—Earnings and Hours of Work in Manufacturing—Annual—Final Report—Price 75 cents**
(separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in autumn from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years:
(1) a segregation of office and clerical workers from the salaried group
(2) a distribution of wage-earners and salaried employees in a given range of weekly earnings and
(3) a distribution of wage-earners in a given range of hours worked in the survey week)

Inquiries regarding these reports should be directed to the Labour Division, Dominion Bureau of Statistics, and subscriptions to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

CHART-I

AVERAGE HOURLY EARNINGS IN MANUFACTURING CANADA AND THE PROVINCES

COMMENTARY

Average hourly earnings throughout Canada continued their post-war trend during 1964, with all the reported industry divisions, and most of their components, registering gains. In the manufacturing divisions, hourly earnings advanced by 7 cents to a new high of \$2.02, an increase of 3.6 p.c. Average weekly hours were 0.2 hours longer, thus maintaining the upward movement which began in 1961. The rise in average weekly wages of \$3.50, to \$82.90, represents the largest absolute gain in any year since 1952. The high rate of employment growth in the higher-paid durable goods industries was responsible to some extent for the upward movements in hourly and weekly earnings.

Durable Goods

In durable goods manufacturing, average hourly earnings rose by 3.8 p.c. to \$2.19 in 1964, a gain of 8 cents in absolute terms. This rise, together with an increase of 0.3 hours in average weekly hours, advanced average weekly wages from \$87.25 to \$91.08. All major industries reported increases in hourly earnings, ranging from 2.7 p.c. in non-ferrous metals and iron and steel to 4.1 p.c. in wood products. Average weekly hours were longer and more wage-earners were reported in practically all industries. The most significant movements in employment were in transportation equipment, iron and steel and non-ferrous metals, with gains of 10.5 p.c., 7.1 p.c. and 6.5 p.c., respectively. The higher level of activity reported by these industries, where rates are above-average, was responsible for a substantial part of the rise in average hourly earnings. Wage increases, which were reported during the year by a considerable number of industries, also contributed. Some restraining influence was exerted by the effect of more activity in wood products, electrical apparatus and non-metallic minerals, where the prevailing rates are below the durable goods average.

Non-durable Goods

During 1964, an increase of 3.4 p.c. raised average hourly earnings by 6 cents, to \$1.85, in non-durable goods manufacturing. In percentage terms, this is slightly lower than the increase recorded in 1963 and also lower than the average for

the post-war period. Average weekly wages rose to a new high of \$74.91, an increase of 4.2 p.c., and average weekly hours were 0.2 hours longer. All major industry groups showed higher hourly earnings during the year, with wage rate increases being reported by most. The expansionary pressure on earnings was occasioned primarily by overtime and wage increases, strengthened by higher employment, in those industries paying rates higher than the non-durables average. Typically, rubber products, printing and publishing, paper products and chemical products. Despite upward wage revisions in food and beverages, miscellaneous manufacturing, textiles and clothing, increased employment and generally longer hours at below-average rates in these industries somewhat restrained the rise of average hourly earnings in the non-durables sector.

Non-manufacturing Industries

Average hourly earnings in mining were 3.1 p.c. higher in 1964, a somewhat larger gain than that registered for the preceding year. Average weekly hours were 0.2 hours longer and average weekly wages rose by 3.7 p.c. In the industry as a whole, employment remained at the 1963 level. Wage rate increases, which occurred in all groups, made a major contribution to higher hourly earnings. The effect of these was augmented by more activity at above-average rates in metals and reduced activity in fuel mining, where rates are below the divisional average. The latter situation was due primarily to coal mining, where employment and weekly hours decreased by 5.5 p.c. and 0.4 hours, respectively.

In construction, average hourly earnings increased by 5.2 p.c. in 1964 and average weekly wages reached \$92.31, a gain of 5.5 p.c. At 41.0 hours, average weekly hours rose to their highest level since 1957, with the most notable increase (1.0 hours) being registered by general engineering. Employment was higher in all industries except highway construction, where it declined by 0.4 p.c. A combination of more employment, wage increases and overtime in the higher-paid building and general engineering industries was primarily responsible for the advance of hourly and weekly earnings in the division.

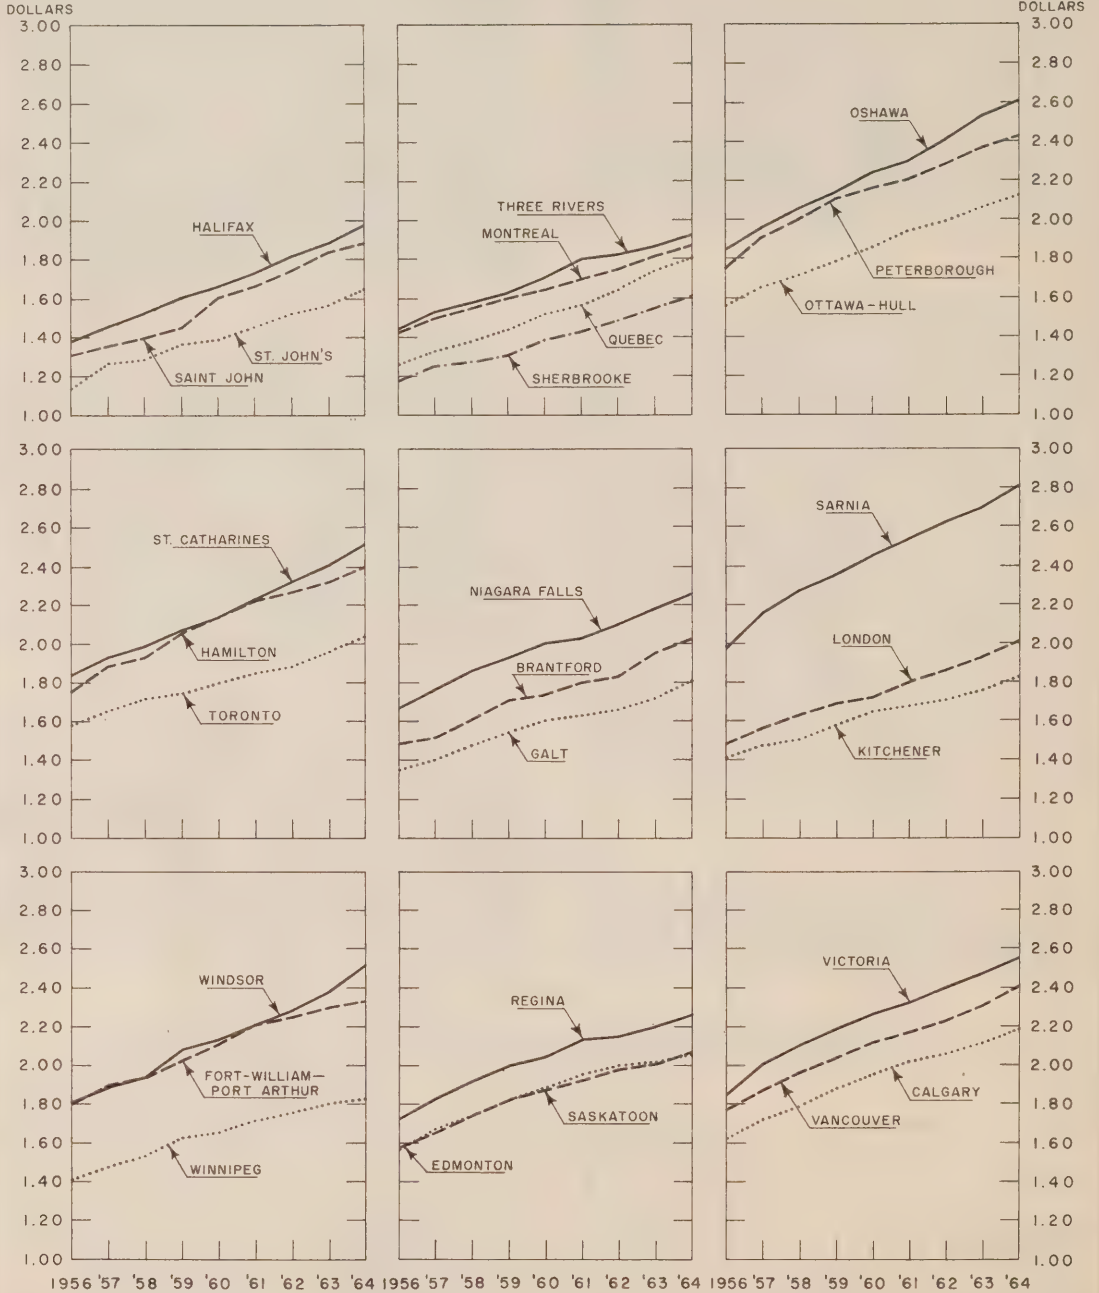

Average Earnings and Hours of Work, Industrial Divisions, Canada, 1945 and 1964

Industry	Hourly earnings			Weekly wages			Average weekly hours

TABLE 2. Annual Averages of Weekly Wages of Hourly-rated Wage-earners¹ by Industry, Canada, 1951-64 - Concluded

Industry	1951	1952	1953	1954	1955	1956	1957	1958	1959	1960	1961	1962	1963	1964
	dollars													
Manufacturing - Concluded:														
*Iron and steel products	55.31	60.90	63.70	64.30	67.77	72.13	75.17	77.05	82.40	84.03	87.05	89.87	92.73	96.32
Agricultural implements	57.76	63.08	62.59	64.50	66.62	67.97	70.90	76.28	81.50	81.59	85.42	88.77	96.35	100.37
Boilers and plate	75.75	77.52	81.34	82.76	86.77	88.29	92.91
Fabricated and structural steel	56.81	64.23	66.82	67.44	68.01	72.04	74.45	75.52	79.10	82.32	84.46	88.15	90.95	94.42
Hardware and tools	50.11	55.50	58.22	59.27	62.22	66.09	67.08	67.80	72.72	73.58	74.63	76.96	79.61	82.68
Heating and cooking appliance	48.34	53.17	55.31	56.96	58.93	61.20	63.42	67.24	70.33	70.53	73.03	75.11	76.95	80.91
Iron castings	56.33	59.83	63.92	64.22	68.55	70.85	72.41	73.88	78.77	79.82	83.10	86.14	88.44	93.84
Machinery (i)	54.24	58.87	62.34	63.32	65.81	70.19	71.82	72.58	77.74	79.68	81.77	85.13	87.86	92.65
Household, office and store	65.77	68.06	72.01	76.44	79.26	81.47	85.10	87.37	91.58
Industrial (j)	71.84	73.12	72.66	78.26	79.84	81.90	85.14	88.01	92.95
Primary iron and steel	59.57	66.03	69.06	68.23	73.93	81.05	87.55	89.36	96.01	97.38	102.43	105.05	108.19	110.06
Sheet metal products	50.55	55.87	59.27	62.10	65.08	67.56	71.01	75.36	80.80	82.93	85.18	85.82	88.74	91.43
Wire and wire products	74.00	77.02	77.64	82.92	82.80	86.58	88.76	92.17	96.11
*Transportation equipment	56.42	60.85	65.24	65.57	67.01	70.20	72.53	75.54	80.54	82.78	86.06	90.67	96.18	100.11
Aircraft and parts	57.46	65.18	69.02	70.81	70.56	73.31	75.40	79.44	81.94	85.45	88.20	87.51	92.59	97.57
Motor vehicles	59.79	64.21	70.13	68.05	71.16	73.77	73.70	78.59	88.32	90.88	96.63	106.13	114.01	115.35
Motor vehicle parts and accessories	56.98	61.72	63.63	64.07	66.74	69.71	71.18	74.42	78.49	80.67	83.99	88.45	93.38	98.85
Railroad and rolling stock equipment	54.79	56.82	62.57	62.88	62.56	66.78	70.17	71.16	76.60	77.23	80.42	83.20	86.36	91.21
Shipbuilding and repairing	52.75	59.29	62.09	62.73	64.53	67.69	72.25	74.46	77.68	79.48	80.14	86.55	90.17	92.58
*Non-ferrous metal products	54.95	60.94	63.22	65.52	68.60	70.93	75.01	76.94	80.72	84.63	87.13	88.36	80.81	94.04
Aluminum products	50.66	57.82	59.13	59.77	60.26	60.25	64.46	68.55	72.05	76.53	78.77	79.92	83.06	84.59
Brass and copper products	52.47	57.35	59.77	61.68	65.21	66.64	69.58	72.10	74.70	78.31	82.24	84.78	88.04	92.81
Smelting and refining	60.73	66.01	68.64	70.94	74.20	77.45	82.09	84.18	89.71	92.90	95.88	97.70	100.40	103.67
Other non-ferrous metal products (k)	57.06	58.86	59.12	59.66	62.04	64.58	65.75	67.82	70.36
*Electrical apparatus and supplies	52.93	57.54	59.02	60.30	61.38	64.83	67.10	69.00	71.99	74.13	76.66	77.91	79.21	82.60
Heavy electrical machinery and equipment	57.64	63.29	65.70	66.57	66.98	71.98	75.43	76.42	79.67	82.57	84.85	87.58	89.13	93.34
Telecommunication equipment	54.79	58.08	61.99	64.57	67.18	70.64	70.35	69.77	71.42
Batteries	63.73	65.97	67.43	71.48	71.18	76.59	77.80	79.88	81.04
Refrigerators, vacuum cleaners and appliances	63.13	66.46	67.20	69.98	72.44	74.30	75.70	77.88	81.53	83.62
Wire and cable	75.02	77.03	81.48	82.80	87.26	89.12	91.69	96.37
Miscellaneous electrical products	61.44	62.45	62.09	64.35	67.97	70.30	72.60	73.85	75.16	79.25
*Non-metallic mineral products (l)	52.20	56.54	59.08	61.30	63.49	66.18	68.70	72.20	74.72	75.86	79.18	82.44	85.14	89.63
Clay products	49.57	53.85	55.79	58.65	60.38	62.01	63.96	65.71	68.58	68.82	71.42	73.64	75.53	78.76
Glass and glass products	50.98	56.10	58.52	59.60	61.84	64.04	65.38	69.76	71.79	73.10	76.57	78.73	82.31	86.05
Products of petroleum and coal	62.92	71.80	75.32	78.54	80.83	84.33	92.20	94.34	100.98	103.46	106.23	110.45	115.06	119.16
Petroleum refining and products	94.97	101.84	104.22	106.95	111.70	116.48	120.64
Chemical products	51.36	55.52	57.85	60.22	62.49	65.60	70.39	73.99	76.58	80.20	83.23	86.16	89.12	92.32
Medicinal and pharmaceutical preparations	40.05	44.07	47.32	49.73	51.29	53.52	54.38	57.37	58.10	60.19	62.46	64.44	67.50	69.65
Acids, alkalis and salts	60.12	63.65	65.64	69.68	73.17	76.27	82.54	85.65	89.70	92.52	96.10	99.49	102.32	106.50
Fertilizers	78.51	80.32	83.47	87.37	89.61	91.88	93.44
Paints and varnishes	68.64	71.23	73.51	76.10	79.57	81.66	84.53
Miscellaneous manufacturing industries	40.17	42.95	46.34	47.52	48.66	50.68	53.42	56.88	58.76	60.62	62.26	63.41	65.72	68.18
Professional and scientific equipment	61.71	65.37	67.88	70.15	72.84	74.88	75.20	79.43	79.88
Construction	47.86	54.99	60.26	59.85	60.49	67.77	72.55	72.36	74.20	78.36	79.93	83.16	87.51	92.31
Building and general engineering (m)	50.67	59.04	64.31	64.08	64.46	72.73	78.47	78.37	79.59	84.76	86.39	89.37	93.64	98.55
Building	62.58	63.55	72.30	77.05	76.71	78.65	83.56	84.47	88.21	92.61	96.69

For footnotes (a) to (q) see notes on last page.

1 In this highly seasonal industry, an average of 12 monthly averages instead of 12 monthly aggregates gives an annual average of 39.9 hours instead of 40.2.

* Durable manufactured goods industries.

TABLE 9. Average Hours and Earnings of Hourly-rated Wage-earners, Specified Industries, Canada, 1945-64

Year and month	All manufactures			Durable goods			Non-durable goods		
	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages	Average weekly hours	Average hourly earnings	Average weekly wages

* The averages at these dates were affected by loss of working time at the year-end holidays in the case of December, and by the Easter holidays in the case of April, 1962 and March, 1964.

Note: Monthly statistics are based on data for the last pay periods of reporting establishments in each month.

December	80.65	193.2	58.91	141.1

Note: The current weekly wages relate to the last pay periods in the month, while the Consumer Price Index relates to the beginning of the month. The current average of weekly wages for any month is therefore adjusted in the above table by the Consumer Price Index for the following month, as more representative of the period in which the wages are spent. A statement of uses and limitations of the adjusted figures appears on page 46.

For Consumer Price Index Statistics, construction methods and component details, see monthly report "Prices and Price Indexes".

NOTES

General.—The monthly statistics of average hours, average hourly earnings and average weekly wages, like those of employment, payrolls and average weekly wages and salaries, are based on data from establishments usually employing 15 persons and over. The latest monthly figures are subject to revision.

Coverage.—Firms are asked to furnish information for the male and female wage-earners for whom they keep records of hours worked, so that the statistics relate, in the main, to hourly-rated wage-earners, or production workers, employed full time and part time. Casual workers are also included, provided that they work at least one day in the reported pay period. Data for salaried personnel are purposely excluded. In many cases, information is not available for certain classes of wage-earners, whose earnings, like those of most salaried employees, are not directly dependent on the number of hours worked; examples of wage-earners frequently excluded are route-drivers, piece-workers in many but not all establishments, truck men, etc. Numerous employers do not keep records of man-hours for any classes of employees. The number of workers for whom information is given in the present report is therefore smaller than the total number of workers (wage-earners and salaried employees) for whom statistics of employment, payrolls, average earnings, sex distribution, etc., are given in the monthly reports on employment and payrolls. These also include figures for certain industries not represented in the present report because relatively few of the wage-earners therein are paid on an hourly basis with the result that man-hour records are lacking. Such industries include public utility operation, trade, finance, insurance and real estate and some branches of transportation, storage and communication and service.

In manufacturing, the data relate to over 71 p.c. of all employees on the staffs of the firms co-operating in the monthly surveys of employment and payrolls; in 1957, the wage-earners for whom information on man-hours was obtained formed some 83 p.c. of the total number of hourly-rated and other wage-earners reported by practically all manufacturing establishments to the Annual Census of Manufactures. In mining and construction, data on man-hours and hourly earnings are provided for approximately 75 p.c. and 69 p.c. of the total employees of firms co-operating in the monthly surveys of employment and payrolls in those industries, respectively; in 1957, the monthly statistics were based on approximately 93 p.c. of the total number of wage-earners reported in the annual survey of the Mineral Statistics Section of the Industry and Merchandising Division.

Man-hours.—The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked; premium or penalty hours credited for purpose of computing overtime payment are not included. Hours

credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked. The averages are obtained by dividing the aggregate hours reported for the week by the number of full-time and part-time wage-earners working such hours.

Wages.—The questionnaire calls for a statement of gross wages earned by the full-time and part-time wage-earners whose hours are reported, before deductions are made for taxes, unemployment insurance contributions, etc. Payments for overtime work, incentive or production and cost-of-living bonuses paid at regular intervals, and amounts credited to wage-earners on leave with pay in the reported pay periods are included. The value of board and lodging, which in some cases is part of the remuneration of workers, is not included. Bonuses paid at infrequent intervals and employers' contributions to welfare funds such as workmen's compensation, unemployment insurance, pension and medical plans and certain other employee benefits are also excluded.

So far as is possible the revised figures of average hourly and weekly earnings incorporate retroactive pay for one month as well as corrections in the material originally tabulated and data received too late for inclusion in the first tabulation; for the most part, such adjustments are not carried back for more than one month.

Pay Periods.—Statistics of man-hours and wages reported for periods exceeding one week in duration are reduced by the appropriate proportions to obtain the number of hours and the wages for one week in the stated pay period. Such data are combined with weekly figures furnished by employers whose records are maintained on a weekly basis, so that, in all cases, the tabulated statistics represent the situation in one week in each month.

Variations in Trends of average earnings result from many factors, such as changes in wage rates, in amounts of overtime work, short-time work, shift differentials, incentive or production bonuses and in the area, occupational and sex distributions of the reported working forces. Differences in industrial distributions, with related occupational and sex distributions, are the principal factors contributing to differences in the levels of earnings in particular areas.

Urban Area Statistics.—Statistics given in the present report for communities listed as "metropolitan areas" and "other major urban areas" in Tables 8 and 9 of the 1956 Census Volume 1 (Population) and in the same tables in Bulletin 1-6, cover the census areas, except those for St. Catharines, which also include establishments in Port Colborne and Welland. Statistics given for urban areas **not** listed in the above mentioned tables cover establishments in the incorporated cities and towns named but also include Iberville with St. Jean, Nitro with Valleyfield, and Preston with Galt.

Measuring the Purchasing Power of Earnings. —

Changing consumer price levels affect the amounts of goods and services which a dollar will buy, and average earnings, of course, will be affected in the same way. An earnings measurement which takes the change of consumer prices into account, can be calculated by reducing actual earnings averages by the percentage amounts consumer price levels rise, or increasing them by the amount price levels fall. The adjusted averages may be used to indicate the comparative quantities of goods and services which could be purchased by average earnings if consumer price levels and consumption patterns had remained constant. The following illustration shows how this kind of an adjustment can be made.

Suppose that a series of weekly average wages rises from \$50.00 in week A to \$60.00 in week B, and that in the same interval a consumer price index advances from 100.0 to 110.0. Because of the 10 per cent rise in consumer prices, \$1.00 will not buy as much in week B as it would in week A. Likewise, a 20 per cent rise from \$50.00 to \$60.00 will overstate the increase which has occurred in the purchasing power of average weekly wages. This overstatement can be removed by reducing the figure of \$60.00 by the amount of the consumer price increase. The adjusted average is \$54.55 ($60.00/110.0 \times 100.0$), which may be referred to as a weekly wage average for week B expressed in the dollars of period A, or it may be said to indicate the level of real weekly wages relative to week A.

The foregoing calculation can be carried a step further to express in index number form the relationship between the week A average of \$50.00 and the week B figure of \$54.55. Taking the week A average of \$50.00 as equal to 100.0, the week B index becomes 109.0 ($54.55/50.00 \times 100.0$). Such an index may be called an index of weekly real wages. It indicates that average wages for week B will buy 9 per cent more goods and services than those received in week A, in spite of a 10 per cent rise in consumer prices. This 9 per cent increase in real wages compares with the rise of 20 per cent in money wages ($60.00/50.00 \times 100.0$).

It should be noted that while the estimates of average real wages may reflect the experiences of broad groups of workers fairly well, their applic-

ability to individual wage-earners depends upon a number of considerations. For example, individual earnings will differ significantly from the group average, depending upon occupation, industry, geographical location, or sex of the wage-earner. Moreover, individual spending habits differ widely, but the consumer price index which is used to adjust the earnings data refers only to the average consumption pattern of a particular income group. Group-spending patterns change over periods of time. To the extent that this occurs, the earnings data adjusted by the consumer price index (which has a "fixed" consumption pattern), will gradually be rendered less valid. Finally, some part of income may be saved, and it should be borne in mind that it is not appropriate to reduce savings to a constant dollar basis by using a price index which reflects consumption patterns.

It should also be kept in mind that measures of change in real earnings calculated from averages of gross earnings may differ from changes in the purchasing power of "take-home" pay, due to such factors as changes in personal income tax, pay deductions for such things as social insurance and pension plans. Thus index numbers of real wages should not be interpreted as measuring fluctuations in the levels of consumption of wage-earners or wage-earners' families; they are intended to show only the trend in purchasing power of wages over the items covered by the price index, and in addition to the factors already mentioned, do not take into account other family income (including family allowances) or changes in the savings position of families.

In Table 13, 1949 figures are used as reference levels for indexes of both actual and real wages, since this is the year selected by the Dominion Bureau of Statistics for general post-war index number comparisons. However, the adjustment made in the foregoing illustration can be applied to any reference level, and it should not be inferred that the 1949 reference period has any special validity for earnings comparisons. Percentage change between any two periods will be the same regardless of the reference period selected.

FOOTNOTES

The following footnotes explain the content of various industrial classes listed in the detailed tables in this bulletin. In some industries, the group breakdown is less extensive than in the Standard

Industrial Classification; in these cases, figures for certain categories not shown are contained in the group totals.

- (a) Alluvial gold and auriferous quartz mining.
- (b) Copper-gold-silver; iron; nickel-copper; silver-cobalt; silver-lead-zinc; uranium and miscellaneous metal mining.
- (c) Oil and natural gas; oil shale and bituminous sand; contract drilling and prospecting for oil.
- (d) Non-metal mining and quarrying; clay and sand pits.
- (e) Tires, tubes and other rubber products.
- (f) Leather gloves and mittens; leather tanneries and miscellaneous leather products.
- (g) Miscellaneous wood products.
- (h) Paper boxes and bags; roofing papers; miscellaneous paper products.
- (i) Household, office and store machinery; machine tools; machinery, n.e.c.
- (j) Machine tools; machinery, n.e.s.
- (k) Jewellery and silverware; white metal alloys; miscellaneous non-ferrous metal products.
- (l) Abrasives; asbestos; hydraulic cement; clay; glass; lime and gypsum; stone; concrete and miscellaneous non-metallic mineral products.
- (m) Building includes buildings and structures, special trade contractors. General engineering includes other construction, other than highways, bridges and streets.
- (n) Interurban bus and coach and urban and suburban transportation systems; taxi-cab and truck transportation; services incidental to transportation; other transportation.
- (o) Hotels and restaurants; laundries; dyeing, cleaning and pressing plants, and recreational services.
- (p) The Northwest Territories, with the exception of Baffin Island, are included in Alberta. Baffin Island is included in Quebec. The Yukon Territory is included in British Columbia.
- (q) Averages in 1963 and 1964 were derived from the aggregates. In seasonal industries, averages derived by the former method of averaging monthly averages can be supplied upon request. Differences are minor.
- (..) Figures not available.
- (--) Amount too small to be expressed.
- (-) Nil or zero.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$1.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$2.00
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$2.00
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial division, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50
(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

EXPLANATORY NOTES

Notes on methods and scope of monthly surveys of hours and earnings	i
---	---

APPENDIX

A technical note on the conceptual changes introduced in 1966	iv
---	----

INTRODUCTION

The monthly survey of employment, payrolls and manhours on which the DBS reports "Employment and Average Wages and Salaries" (Cat. No. 72-002) and "Man-Hours and Hourly Earnings" (Cat. No. 72-003) are based was substantially revised with the January 1966 survey. Data on the revised concepts were tabulated for each month from January 1957 to December 1965. Thus parallel series on the old and revised bases are available for nine years. An historical volume (Cat. No. 72-504), released in May 1966, covered revised data by months from January 1961 to May 1965. This present publication completes the release of the revised data, and contains monthly data from January 1965 to December 1967, and annual averages from 1957 to 1967. Monthly data from January 1957 to December 1960 are available on request. As well, there is considerable unpublished industry and geographic detail which can be obtained on request provided that the necessary requirements of the Statistics Act are met.

Review of Man-Hours and Hourly Earnings

1967

Average hourly earnings in manufacturing rose by 15 cents to \$2.40 during 1967. This represents an increase of 6.6 p.c., slightly greater than the 6.1 p.c. increase recorded in 1966 and a larger increase than in any year since the early 1950's. Both the durable and non-durable goods components contributed to the rise, recording increases of 6.2 p.c. and 7.8 p.c. respectively. Average weekly hours in manufacturing declined by 0.5 hours to 40.3, partially offsetting the increase in average hourly earnings. The resultant level of average weekly wages at \$96.84 was \$5.19 higher than in 1966.

Durable Goods

A 6.2 p.c. increase in average hourly earnings, partially offset by a 0.5 hour decline in average weekly hours, raised average weekly wages in durable goods manufacturing by \$5.50 to \$105.81 in 1967. Average hourly earnings rose in all component industry groups with increases ranging from 5.0 p.c. in electrical products to 8.6 p.c. in wood products. With the exception of wood products, where there was no change, all groups recorded lower average weekly hours in 1967 than in 1966.

Non-Durable Goods

In non-durable goods manufacturing, average hourly earnings increased by 7.2 p.c. in 1967. All component industry groups contributed to the rise, with increases ranging from 5.5 p.c. in printing, publishing and allied industries, to 9.3 p.c. in food and beverages. The increase in non-durables was higher than the 6.7 p.c. rise recorded in 1966, and considerably above the average yearly increase since 1957 of 3.8 p.c. Average weekly hours were 0.5 hours lower than in 1966, with all component industry groups showing decreases. Average weekly wages rose \$5.45 to \$88.37.

Non-Manufacturing Industries

Average hourly earnings in mining at \$2.84 in 1967 showed a 9.2 p.c. increase over the 1966 average, slightly greater than the increase recorded during 1966 and much above the average increase over the previous ten years of 3.7 p.c. The largest advance was 10.3 p.c. in metal mines. Average weekly hours in mining were slightly less than the average for 1966.

In construction, average hourly earnings at \$3.12 were 11.4 p.c. higher than in 1966. This compares with an increase of 10.7 p.c. in 1966. The ten year average increase was 4.8 p.c. Both component industries contributed to the increase. Average hourly earnings in engineering rose slightly less rapidly during 1967 than in 1966; the opposite was true in the building component. Average weekly hours were lower in both components, and the decrease of 0.9 hours in the construction total partially offset the increase in average hourly earnings, limiting the increase in average weekly wages to 9.3 p.c. (\$128.97).

Regions

During 1967, the Prairie Region recorded the largest relative increase (9.3 p.c.) in average hourly earnings in manufacturing. This compares with a rise of 5.5 p.c. during 1966. Other increases ranged from 6.3 p.c. in Ontario to 8.3 p.c. in British Columbia. With the exception of Ontario, where the rate was slightly less, all regions showed larger relative increases in 1967 than in 1966. Levels of average hourly earnings ranged from \$1.97 in the Atlantic Region to \$3.01 in British Columbia. Average weekly hours were lower in 1967 than in 1966 in all regions except British Columbia where there was no change. The resultant levels of average weekly wages ranged from \$79.80 in the Atlantic Region to \$113.21 in British Columbia.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1967 was 68.6 per cent of all manufacturing employees reported in the Employment Section's survey. In mining the hourly paid wage-earners represented 68.2 p.c. of reported employment and in construction 80.0 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

Wage-earners are defined as those employees engaged in actual production and related operations, including working foremen doing work similar to that of the employees they supervise. Also included are maintenance, warehouse and delivery staffs, routemen, driver-salesmen, sales clerks in retail stores, waitresses, etc.

Wage-earners not receiving pay for anytime during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or they draw pay from their employers (e.g. vacation pay). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuations in the series.

Man-hours

The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked. Premium or penalty hours credited for purposes of computing overtime payments are excluded. Hours credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked.

Wages

The wages of reported wage-earners are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are straight-time wages, over-time wages, cost-of-living allowances, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The wages concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, or other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the wages data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated each month show the numbers of wage-earners, their hours and their wages for the current and preceding month. The statistics first published for each month are preliminary; retabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages and aggregates are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", DBS Catalogue No. 12-501. The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few classes not found in the S.I.C. These include:

Durable-goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products.

Non-durable goods manufacturing - The sum of the remaining manufacturing industries.

Building - The sum of general contractors and special trade contractors.

Engineering - The sum of highways, bridges and streets and other construction.

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly, Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas are based on a labour market concept; the areas usually include a main centre and surrounding territory. A list showing the territory included in each tabulated urban area is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain construction establishments is included in the provincial totals but is not assigned to an urban centre.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the total number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages by total weekly hours. Average weekly wages are obtained by dividing total weekly wages by the total number of wage-earners. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages.

APPENDIX

A TECHNICAL NOTE ON THE CONCEPTUAL CHANGES INTRODUCED IN 1966

This appendix outlines in detail the conceptual differences between the old and revised series. The extent to which the revised concepts have affected the actual data in the various series has been outlined in the introduction to the "Historical Series" (Cat. No. 72-504) mentioned above. The notes for this publication describe the concepts that are now in use.

The revision incorporated four main areas of conceptual change: a revised definition of the reporting unit, a revised system of industrial classification, a revised system of geographic classification, and a revised method of preparing index numbers.

Revised Definition of the Reporting Unit

This change is part of a larger revision throughout the DBS to assure that all data from establishment surveys are comparable. The basic unit now used by the Employment Section is the establishment as defined in the introduction to the Standard Industrial Classification Manual (Cat. No. 12-501).

Briefly, an establishment is now defined as the smallest unit which is a separate operating entity capable of reporting all elements of basic industrial statistics. An establishment is typically a factory, mine, store or similar unit. In most cases it is a separate firm. The items of data required of an establishment are: on the input side - materials used, process supplies used, fuel and power consumed, goods purchased for resale, earnings, and employment; and on the output side - commodities sold, shipped, or produced, or other appropriate measure of services rendered. Different inputs and outputs apply in different industrial sectors and the above are merely illustrations of the main elements. The important consideration is that the elements of input and output permit the calculation of "value added" or "gross markup" or "gross profit", as well as the related data on employment, man-hours and payrolls.

The Employment Section uses the standard definition of an establishment for its industrial classification. The entire activity of an establishment is classified to an industry according to the principal activity of the establishment. For this purpose, the activity of the establishment is determined, conceptually, by the net value added by its different industrial activities. This approach is followed in assigning an establishment to an industry division (e.g. manufacturing or trade), but frequently it cannot be used to assign the establishment to an individual industry within a division because the required records are not available. In this case, the principal activity is determined by the gross revenue obtained from the products produced or handled or services rendered. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time principal activity changes.

When the activities of an establishment extend over a number of stages in the fabrication of a product, the establishment is classified by the final product, so long as the sales of intermediate products do not predominate. This rule does not apply to establishments which sell only goods of their own making; these are classified as manufacturers.

Head offices, regional offices and ancillary units (e.g. garages, warehouses, sale branches, etc.) that serve one establishment or a number of different establishments are assigned industrially along with the main establishment on the basis of the establishment's principal activity. Head offices or ancillary units serving establishments in different industries are classified at the level of the major groups of industries only and are not assigned to an individual industry. When the ancillary units, regional office or head office can supply a full range of principal statistics covering its own operation, it is, of course, treated as a separate establishment and assigned to the industry indicated by its principal activity.

In the past, the employment and earnings data for an industry related as closely as possible to all workers carrying on activities associated with, for example, the wholesale trade industry. Thus, manufacturing establishments were requested to send in separate reports for any sales outlets they operated and data from these reports were assigned to trade, not to manufacturing. Under the new definition sales branches are assigned to the industry indicated by the principal activity of the establishment of which they are a part, usually one of the manufacturing industries. Some 35,000 employees have been transferred from trade to manufacturing as a result of this change of concept. While the transfer of sales offices has been the largest result of this consolidation of previously separate reports into one establishment report, there are many other examples: some reports that were formerly in logging are now classified to sawmills, some restaurants located in stores that were formerly in service are now in trade, some erection staffs of metal fabricators that were formerly in construction are now in manufacturing.

While the Employment Section uses the establishment as a basis for assigning a report to an industrial class, it often uses an industrial unit smaller than the establishment in assigning a report to a geographic class. Where an establishment has a number of sub-units operating in different urban areas, separate reports are usually requested for each location and these reports are classified to the urban area where the employees are actually located. If the establishment, rather than a sub-establishment unit, had been used in the geographic classification, all the employment of the establishment would have to be assigned to the centre where the main office was located. Thus employment in such centres as Toronto or Montreal, where there are many head offices, would have been exaggerated while the employment in many smaller centres would have been understated.

In addition to changing the definition of the reporting unit, the Employment Section has clarified its definition of the minimum size of reporting units. In the past, firms (a firm is defined as an industrial unit which is based on a legal arrangement and may have a number of component establishments) were included in the survey if they usually employed 15 persons or more. This definition resulted in some ambiguity in the handling of seasonal firms which operated with few employees during the greater part of the year but had well over 15 employees at the peak of their operation. Under the new definition, a firm is included in the survey if it had 20 or more employees in any month of the year. New firms, and firms falling below 20 employees, are asked whether they expect to have 20 employees at any time during the year and are included or not included in the survey on the basis of their reply. The new definition has led to the exclusion of a few small firms that had between 15 and 20 employees and to the inclusion of some seasonal firms which met the "20-plus" criteria for a month or two of the year, but usually operated with fewer than 15 employees.

This modification of the minimum size definition has had virtually no effect on the Statistics.

In summary, three types of industrial units are distinguished for purposes of the employment, payroll and manhour statistics: the firm, the establishment, and the sub-establishment. The firm is a legal entity that can supply financial statistics as well as the principal statistics needed to calculate value added. The establishment is the smallest industrial unit that can supply principal statistics. The sub-establishment is a unit of an establishment which can report employment, payrolls and manhours data but cannot supply a full range of principal statistics. All three units are used in the employment survey. There is a minimum size cut-off that is based on the size of firm. A report is classified to an industry group on the basis of the principal activity of the establishment and to a geographic group on the basis of the location of the sub-establishment. In most cases, of course, establishments are separate firms with only one geographic location.

Revised Industrial Classification

The second aspect of the revision programme was the adoption of the 1960 Standard Industrial Classification. A complete description of the new classification can be found in the Standard Industrial Classification Manual (Catalogue No. 12-501).

In the S.I.C. manual, establishments are classified to an industry which is identified by a 3-digit number called the S.I.C. code. The S.I.C. codes are shown in all the main tables in Employment Section publications. In certain industries, the Employment Section makes a finer breakdown of the S.I.C. code (i.e. a 4-digit number). Three-digit industries are combined to form major groups and major groups are combined to form industry divisions. The Employment Section combines all the industry divisions that it surveys to form an "industrial composite" total.

The revisions of the industrial classification system were substantial. The following list of revised industry divisions and major groups indicates the main changes that were made.

Division 1 - Agriculture

Not included in the survey.

Division 2 - Forestry, chiefly logging

No change.

Division 3 - Fishing and Trapping

Not included in the survey.

Division 4 - Mining

Major Group 1 - Metals

No change.

Major Group 2 - Mineral Fuels

Absorption Plants connected with Natural Gas Processing, formerly in Manufacturing, are now included in this group.

Many of the services formerly in this group are now in Services Incidental to Mining.

Major Group 3 - Non-Metals, except Fuels

The Salt Processing Industry, formerly in Manufacturing, is now included in this group.

Quarries and Sand Pits, formerly in this group, now forms a separate group.

Major Group 4 - Quarries and Sand Pits

This is a new major group; formerly it was in the Non-Metals group.

Major Group 5 - Services incidental to Mining

This is a new major group which includes petroleum prospecting, other prospecting, contract frilling for petroleum, other contract drilling and other services incidental to mining. Many of these industries were formerly included in mineral fuels.

Division 5 - Manufacturing

Non-Durable Goods

Includes Major Groups 1, 2, 3, 4, 5, 6, 7, 10, 11, 18, 19 and 20.

Durable Goods

Includes Major Groups 8, 9, 12, 13, 14, 15, 16 and 17.

Major Group 1 - Foods and Beverages

This group now contains certain establishments engaged in Poultry Processing formerly in Agriculture and the Vegetable Oil Mills Industry formerly in Manufacturing.

The new Slaughtering and Meat Processing Industry corresponds to the old Meat Products Industry except that some poultry Processors are now excluded.

The new Biscuits Industry was formerly called the Biscuits and Crackers Industry. The new Bakeries Industry was formerly called the Bread and Bakery Products Industry.

The new industries Distilleries and Breweries, respectively, were formerly published together under the title, "Distilled and Malt Liquors".

Major Group 2 - Tobacco Processing and Products

This group is now split into two industries: Leaf Tobacco Processing, and Leaf Tobacco Products.

Major Group 3 - Rubber Products

A new industry was created for manufacturers of Tires and Tubes.

Major Group 4 - Leather Products

Shoe Repair Shops, formerly included in this group, are now included in the Service Division.

The new Shoes, except Rubber Industry was formerly called Boots and Shoes, except Rubber.

Major Group 5 - Textiles

The new Woollen Yarn and Cloth Industry corresponds to the old Woollen Goods Industry except that a number of Fibre Preparing Mills, Pressed and Punched Felt Mills and establishments in Miscellaneous Textile Industries are now excluded.

The new Synthetic Textiles Industry was formerly called Synthetic Textiles and Silk. The industry consists of two sub-industries: Filament Yarn and Staple Fibres, and Spun Yarn and Fabrics; these are Employment Section categories and are not included in the S.I.C.

Major Group 6 - Knitting Mills

This is a new major group; formerly it was included in the clothing group.

Major Group 7 - Clothing

This group now excludes: Knit Goods, now a separate major group; Dress-making, now in the Service Division; and Fur Dressing and Dyeing, now in the Miscellaneous Manufacturing group.

Major Group 8 - Wood Products

The Furniture Industry, formerly in this group, now forms a separate major group.

Sawmills, Veneer and Plywood Mills, and Sash, Door and Planing Mills, respectively, were formerly combined as Saw and Planing Mills.

Major Group 9 - Furniture and Fixtures

This is a new major group. It consists of the Furniture Industries formerly in the Wood Products group and the Electric Lamp and Shade Industry, formerly in Miscellaneous Manufacturing, and in Non-ferrous Metal Products.

Major Group 10 - Paper and Allied Industries - No change.

Major Group 11 - Printing, Publishing and Allied Industries - No change.

Major Group 12 - Primary Metal Industries

Major Group 13 - Metal Fabricating Industries

Major Group 14 - Machinery (except electrical)

These three new groups were formed by re-grouping the industries of the Old Iron and Steel Products and Non-ferrous Metal Products groups. As a result of the re-grouping, some of the new industries are not comparable with the industries in the old classification. No distinction is now made between establishments making fabricated metal products of iron and steel and those making similar products of non-ferrous metals. Some other important changes are:

Manufacturers of Domestic Stoves and Ranges, formerly included in the old Heating and Cooking Appliances Industry, are now in the Electrical Products group.

Manufacturers of Washing Machines and Sewing Machines, formerly in the Machinery Industry, are now in the Electrical Products group.

The new Iron and Steel Mills Industry now includes some establishments in the Coke and Gas Industry which were formerly in the Petroleum and Coal Products group.

Blacksmithing, formerly in the Iron and Steel Products group, is now in the Service Division.

Jewelry and Silverware Manufactures, formerly in the Non-Ferrous Metals group, are now in the Miscellaneous Manufacturing group. Watch and Jewelry Repairs are now included in the Trade Division.

Major Group 15 - Transportation Equipment

The Auto Repair and Garages Industry, formerly in this group, is now in the Trade Division. Bicycles and Parts, formerly in this group, is now included in the Miscellaneous Manufacturing group and in the Trade Division.

The Motor Vehicles - Assembling Industry corresponds to the old Motor Vehicles Industry except that Truck Trailer Manufacturers are now excluded.

The Motor Vehicles - Parts and Accessories Industry corresponds to the old Motor Vehicle Parts and Accessories Industry except that Truck Body Manufacturers are now excluded.

Major Group 16 - Electrical Products

Radio, Television, and Electrical Appliance Repair Shops, formerly included with the industries in this group, are now in the Trade Division.

The Major Appliances, including Non-Electric Industry includes Manufacturers of Washing Machines, Sewing Machines, and Domestic Stoves and Ranges which were formerly in the Iron and Steel Products group.

Formerly, Household Radios and Televisions and Communications Equipment were published together as Telecommunications Equipment. The new Communications Equipment Industry now includes Manufacturers of Telephone Equipment.

The Electrical Industrial Equipment Industry corresponds to the old Heavy Electrical Machinery Industry except that establishments engaged in Armature Rewinding and Electric Motor Repair are now in the Service Division.

Major Group 17 - Non-Metallic Mineral Products

Ready-Mix Concrete Manufacturers are now included in this group; formerly they were in the Trade Division.

The Salt Processing Industry, formerly in this group, is now in the Mining Division.

Major Group 18 - Petroleum and Coal Products

Some Manufacturers of Coke and Gas Products, formerly in this group, are now in the Primary Metals Industries group.

Absorption Plants formerly in the Petroleum Refineries Industry are now in the Mining Division.

Major Group 19 - Chemicals and Chemical Products

Vegetable Oil Mills, formerly in this group, are now in the Food and Beverages group.

The Industrial Chemicals Industry corresponds to the old Acids, Alkalis and Salts industry except that the new industry also includes Manufacturers of Synthetic Rubber, Compressed Gases, and certain Fertilizer Materials.

Major Group 20 - Miscellaneous Manufacturing Industries

Now included in this group are: Jewellery and Silverware, formerly in the Non-Ferrous Metals group; Bicycles, formerly in the Transportation Equipment group; and Fur Dressing and Dyeing, formerly in the Clothing group.

The Electric Lamp and Shade Industry, formerly in this group, is now included in the Furniture and Fixtures group.

Division 6 - Construction

The Employment Section does not use the S.I.C. major groups in this Division. Instead, Building Construction General Contractors (SIC 404) and Special Trade Contractors (SIC 421) are combined to form a "Building Industry". Contractors in Highway, Bridge and Street Construction (SIC 406) and in Other Construction (SIC 409) are combined to form an "Engineering Industry".

Highway, Bridge and Street Maintenance, formerly included in the Highway, Bridges, and Streets Construction Industry, is now in the Transportation, Communication and Other Utilities Division.

Division 7 - Transportation, Communication and Other Utilities

Major Group 1 - Transportation

The Railway Transport Industry was formerly called Steam Railways. The Telegraph Industry, formerly included with the Railways is now in the Communications group. The Railway Industry consists of three sub-industries: Railway Transportation, Maintenance Equipment and Maintenance of Ways and Structures. These are Employment Section categories and are not part of the S.I.C.

The Bus Transport, Interurban and Rural, Industry and the Urban Transit Industry were formerly published together as Urban and Interurban Transportation.

Highway, Bridge and Street Maintenance is a new industry in this group. Formerly it was included in the Construction

Division. This industry consists mainly of provincial government operations.

Major Group 2 - Storage

No change.

Major Group 3 - Communication

The Radio and Television Broadcasting Industry was formerly called Radio Broadcasting.

The Telegraph and Cable Industry includes Telegraphic Services formerly in the Transportation group.

The Post Office is a new industry in this group. Formerly it was in Government Services and not included in the survey.

Major Group 4 - Electric Power, Gas and Water

This group was formerly a separate industrial division called Public Utility Operation.

Division 8 - Trade

Major Group 1 - Wholesale Trade

Now included in this group are: Lumber, Building Materials and Supplies; Seeds and Fertilizers; and Farm implements and Equipment. Formerly these were in Retail Trade.

The Ready-Mix Concrete Industry, formerly in this group, is now in Manufacturing.

Major Group 2 - Retail Trade

Lumber, Building Materials and Supplies; Seeds and Fertilizers; and Farm Implements and Equipment, formerly included in this group, are now in Wholesale Trade.

Watch and Jewellery Repair Shops, formerly in Manufacturing, are now included in this group.

Automotive Products now includes Motor Vehicle Repair Shops, formerly in Manufacturing.

Household Furniture and Appliance Stores now includes Radio, Television and Electrical Appliance Repair Shops, formerly in Manufacturing.

Division 9 - Finance, Insurance and Real Estate

Major Group 1 - Financial Institutions

Formerly this group was called Banking, Investment and Loans.

Major Group 2 - Insurance and Real Estate

This is a new major group. Formerly Insurance was published separately.

Division 10 - Service

Government Service, formerly an unsurveyed major group in this division, now forms a separate division.

Major Group 1 - Education

Not included in this survey, but will be covered by another Employment Section Survey of employment only.

Major Group 2 - Health and Welfare

Same as above.

Major Group 3 - Religious Organizations

Same as above.

Major Group 4 - Recreational Services

No changes.

Major Group 5 - Business Services

The scope of this major group has been narrowed to include only services to business management. Labour Organizations and Trade Associations, formerly included in this group, are now in Miscellaneous Services.

Major Group 6 - Personal Services

Shoe Repair Shops and Dressmaking, formerly in Manufacturing, are now included in this group.

Private Households, included in this group in the S.I.C. are not surveyed by the Employment Section.

Laundries, Cleaners and Pressers were formerly called Laundries and Dry Cleaning Plants.

The Hotels, Restaurants, and Taverns Industry corresponds to the old Hotels and Restaurants Industry, except that Lodging Houses and Residential Clubs are now excluded.

Major Group 7 - Miscellaneous Services

This is a new major group consisting of Labour Organizations and Trade Associations (formerly in Business Service); Photography (formerly in Personal Service); Blacksmithing and Welding (formerly in Manufacturing); Miscellaneous Repair Shops; Services to Buildings and Dwellings (formerly in Personal Services) and Other Miscellaneous Services.

Division 11 - Public Administration and Defence

Not included in the survey.

Revised Geographic Classification

The third aspect of the revision was the adoption of a new system of geographic classification. The main purpose of this revision was to clarify and standardize the urban area definitions used in the survey.

The Employment Section now tabulates data for 91 urban industrial areas of which 17 are metropolitan areas as defined by the Population Census. Each area is identified by the name of the principal city, or cities, but in practically all cases the area includes satellite communities. Wherever possible, this surrounding area was defined to include the whole of adjacent municipalities, parishes or townships so that a composite area is an aggregation of local government units listed in the Standard Geographical Classification. The general result of this revision was to enlarge the boundaries of urban areas and thereby to include more employment in these areas. An example is Toronto which now includes Oakville. The changes in the urban area statistics resulting from this revision were small. However, there were two major changes in the grouping of urban areas. Galt is no longer a separate urban area; it is now included in the Kitchener metropolitan area. Data from Welland and St. Catharines are now published separately; formerly Welland had been included in St. Catharines. A booklet giving the definitions of the new urban areas is available to users on request from the Employment Section.

Another revision of the geographic classification relates to the exclusion of data from the Yukon and Northwest Territories from the provincial totals. Segregated data for these territories is now tabulated. Formerly, the Northwest Territories with the exception of Baffin Island had been included in Alberta; Baffin Island had been included in Quebec; and the Yukon had been included in British Columbia. The resulting changes in the provincial statistics were small, because of the limited number of larger establishments in the northern territories.

Revised Series of Index Numbers

The final aspect of the revision relates to two changes that were made in the series of index numbers. The first change was the transfer from a 1949 base to a 1961 base. Index numbers compare data from the current period with data from a base period. If this comparison is to be clear and direct, the number of years separating the current period from the base period must not be too great. To assure that the series are meaningful, periodic reviews of the base period are therefore necessary. The year 1961 was chosen as the new base period because the economic conditions in that year were thought to be not abnormal and because the decennial census conducted that year provides data that are useful in analyzing employment index numbers.

A second change was a new method of constructing index numbers. Index numbers for any industry-area unit are prepared by dividing base period data into the data for a given month. The data for the given month are those that meet the 20 or more employees criteria described above. The base period data are the average of the monthly data in 1961 of all reporting units operating in the industry-area unit in 1961 that had 20 employees or more in any month in 1961. Base period data from an establishment not reaching 20 employees in 1961 is, of course, also included if the establishment is part of a multi-establishment firm having a total of 20 or more employees in 1961. In practice it is not the industry-area unit itself that is given a base figure, but rather a base assigned to each reporting unit so that cases where the reporting practice of an establishment changes or where an establishment changes from one industry to another or from one area to another may be dealt with. In all cases the base period for an industry-area unit reflects the situation as it was in 1961.

The revised method of constructing index numbers made it possible to have a fixed base so long as the industrial and geographic classification remains unchanged. The base will change only when the industrial or geographic code of a reporting unit is changed without any corresponding change in the activity or location of the reporting unit itself. An example would be an establishment with a number of branch offices whose payroll records in 1961 did not allow it to report separate data for employees located in various urban centres. If the establishment changed its bookkeeping procedure at a later date in such a way that it was possible to obtain these urban area segregations, the Employment Section would add the appropriate base period figures to the various urban areas at the same time as the new urban detail was added to the current tabulations.

Under the old system of calculating index numbers, base changes were much more frequent. In addition to the type of base change described above, when a previously untabulated firm grew to 15 or more employees, its current employment was added to the current tabulations, and its base period employment was also included, even if the normal employment in the base period was fewer than 15 persons. On the other hand, under the old method when the current employment of a firm fell below 15, it was removed from the current tabulation while its base period employment was usually still included.

The revised method of preparing index numbers, therefore, resulted in a more stable base. A relatively stable base

will make future transfer to a new base period simpler and more accurate and facilitates conversions and other manipulations of index numbers by users.

Index numbers on the revised basis were re-tabulated back to January 1957. The following is a more detailed account of the procedures used in this operation. While the description refers to employment data only, the same procedures were followed for payroll data.

1. The most general case was that of a firm which had been operating in the same industry-area unit since 1957. Employment data from the firm were included in the tabulations for each year in which the firm reported 20 or more employees in any month of the year. If the firm had 20 or more employees in any month of 1961, it was given a base equal to its aggregate employment reported in 1961 divided by 12; otherwise it was given a zero base. A marginal firm that had, for example, over twenty employees in 1957, 1958 and 1960 was also included in the tabulations for 1959, even if it did not reach 20 employees that year.

2. When a firm began or ended operations in 1961, it was given a base equal to its aggregate employment in 1961 divided by 12, regardless of the number of months of actual operation in 1961. When a firm operated throughout 1961, but the Employment Section did not receive reports for all the months in 1961, the firm was given a base equal to the aggregate employment reported in 1961 divided by the number of months for which reports were received. Of course, if the firm never reached 20 employees in the reported months, it was given a zero base. Special procedures had to be followed in the case of firms with seasonal employment when data for the whole year are not available; the employment reported for only part of the year might not be representative of the annual employment in these firms.

3. If the Employment Section did not have sufficient information on record to give a firm a base figure, it collected the necessary data from the establishment or from other sources within the Bureau. If the required data could not be obtained, the base was estimated on the assumption that the employment in the firm had followed the trend of the smallest industry-area unit in which the establishment was tabulated.

4. Establishments and sub-establishments were treated in the same way as single-establishment firms, except that the individual establishments did not need to have 20 employees in the year to be included in the tabulations. However, amalgamations (when several branches that formerly reported separately were combined on one report) and breakdowns (when several branches formerly on one report were reported separately) required special procedures. For example, if branches which were combined on one report in 1961 sent in separate reports in later years, the base for each branch was calculated by apportioning the 12 month average of the 1961 employment on the ratio of the employment at the time of the breakdown. The data from 1957 to the time of the breakdown continued to be tabulated as a single unit.

5. If an establishment had not remained in the same industry-area cell since 1957, its base was tabulated in the industry-area unit relevant to the base year and the data for the other years were tabulated in the industry-area unit relevant to those years. If an establishment changed its industry-area cell during 1961, its base year employment was divided between the two cells.

6. If there was a change in the count of employees in an establishment's report because of a change in concepts, or because of the addition of branches not previously covered, the base was adjusted in such a way as to keep the trend of the index numbers comparable. For example, if a new group of employees was included in an establishment's report during 1961, the employment in the months of 1961 prior to the change and after the change was averaged. The base used for the period back to the change was the average after the change and the base used for the period from 1957 to the date of change was the average prior to the change.

7. Occasionally an establishment failed to send in its monthly reports in 1961 promptly enough for inclusion in the tabulations at that time. The Employment Section estimated the employment figures for these late reporters, and these estimated figures were used in calculating the base unless there was a significant discrepancy between the estimated and the reported figures.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year
(Estimates of total numbers of employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-502 - Labour Income, 1926-58 - Price 75 cents
(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-503 - Estimates of Employees by Province and Industry, 1961-64 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial division, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50
(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

SYMBOLS

- .. Figures not available.
- Nil or zero.
- Amount too small to be expressed.

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publication Distribution, Dominion Bureau of Statistics, Ottawa, or to the Queen's Printer, Hull, P.Q.

EXPLANATORY NOTES

Notes on methods and scope of monthly surveys of hours and earnings	i
---	---

REVIEW OF MAN-HOURS AND HOURLY EARNINGS
1966-68

INTRODUCTION

The data in this report are based on the twelve monthly surveys of employment, payrolls, and man-hours, the results of which are published in the monthly D.B.S. publication "Man-hours and Hourly Earnings" (Catalogue No. 72-003). In adding the monthly data to reach annual totals, the data are "weighted" in the sense that the annual average earnings and hours figures are calculated using aggregate payroll and hours data, not, for example by adding together the twelve monthly average hourly earnings figures. The survey covers establishments in mining, manufacturing, and construction plus smaller subdivisions of several other industry division.

MANUFACTURING

Average hourly earnings in manufacturing rose by 18 cents to \$2.58 from 1967 to 1968. This represented an increase of 7.5 p.c. in comparison to the 6.6 p.c. increase recorded in 1967. This is the largest gain recorded in any year since the early 1950's. Increases in the durable goods component (8.1 p.c.) and the non-durables component (6.8 p.c.) both contributed to the advance. While there was no change in average weekly hours (40.3 hours), average weekly wages rose by \$7.16 to \$104.00.

DURABLE GOODS

Average hourly earnings rose by 8.1 p.c. to \$2.79 in 1968, a gain of 21 cents over 1967. This rise, together with a slight increase of 0.1 hours in average weekly hours advanced average weekly wages from \$105.32 to \$113.83. The largest gains in average hourly earnings were recorded in transportation equipment (9.6 p.c.) and in wood products (8.8 p.c.). The smallest increases occurred in primary metal industries, and machinery (excluding electrical). There was little change from 1967 in average weekly hours in any of the component industries.

NON-DURABLE GOODS

Compared with 1967 average hourly earnings rose by 6.8 p.c. to \$2.37 from \$2.22. Average weekly hours decreased slightly by 0.1 hours to 39.7 hours. Average weekly wages increased by \$5.97 to \$94.34. All industry groups in this division showed higher average hourly earnings. Increases in average hourly earnings ranged from 9 cents (6.1 p.c.) in knitting mills to 25 cents (7.3 p.c.) in petroleum and coal products. The largest percentage gains were reported in tobacco products, (9.4 p.c.) and in clothing (8.1 p.c.). There was little change from 1967 in average weekly hours.

MINING

In mining the 8.1 p.c. increase from \$2.84 to \$3.07 between 1967 and 1968 in average hourly earnings was smaller than the comparable 9.2 p.c. rise in 1967. Average weekly hours were slightly lower, and average weekly wages advanced from \$119.09 to \$128.28. Gains of 22 cents in metals and 23 cents in services incidental to mining resulted in an increase of 7.3 p.c. in average hourly earnings in each of these components. Average weekly hours increased slightly in non-metals, except fuels and in services incidental to mining. Decreases ranging from 0.1 hours in metals to 0.6 hours in mineral fuels were recorded, resulting in a slight decline of 0.1 hours in average weekly hours in mining as a whole.

CONSTRUCTION

In construction average hourly earnings at \$3.33 were 6.7 p.c. higher than 1967. This was the smallest annual gain recorded since 1963. Average weekly hours declined by 0.8 hours. Average weekly wages were up by 4.7 p.c., an increase of \$6.08. The building component recorded a 7.9 p.c. increase in average hourly earnings in comparison to 10.8 p.c. in 1967. Similarly, in engineering average hourly earnings rose 4.3 p.c. in relation to 1967's 12.6 p.c. increase. Average weekly hours were lower by 0.7 hours in both components.

ATLANTIC REGION

In manufacturing a 5.1 p.c. gain of 10 cents in average hourly earnings was less than the 1967 6.5 p.c. rise of 12 cents. Average weekly wages advanced in all industrial divisions with the largest gains in the non-manufacturing components. In mining average weekly wages rose 7.7 p.c. from \$104.41 to \$112.47; in construction, 7.6 p.c. from \$93.48 to \$100.63. With the exception of the non-durables component where there was no change, average weekly hours declined in all divisions in a range from 0.1 hours in manufacturing to 0.9 hours in construction.

QUEBEC

In 1968 larger increases in average hourly earnings compared with 1967 were recorded in manufacturing, its durables subdivision, and in mining. Manufacturing and the durables had the greatest gains of 17 cents (7.9 p.c.) and 19 cents (8.1 p.c.), respectively. These increases were larger than comparable 1967 rises of 14 cents (6.9 p.c.) and 15 cents (6.8 p.c.), respectively. Average weekly wages rose in all divisions. Manufacturing which rose 7.3 p.c. from \$88.81 to \$95.33 and the durables component which advanced 7.8 p.c. from \$100.09 to \$107.91 recorded the largest increases. These gains were larger than the 5.4 p.c. and 4.2 p.c. rises, respectively, in 1967. The 3.1 p.c. increase in average weekly wages in the construction division was much smaller than the 13.9 p.c. rise in 1967. Construction, which was the only industrial division showing a great change in average weekly hours, recorded a 1.5 hour decrease.

ONTARIO

Manufacturing recorded larger increases in average hourly earnings in 1968 than in 1967 as a result of the gain in durables. In manufacturing there was 7.5 p.c. gain from \$2.52 to \$2.71 in comparison to 1967's 6.3 p.c. rise from \$2.37 to \$2.52. Average hourly earnings in the durables division advanced 7.9 p.c. from \$2.67 to \$2.88 as compared with an increase of 6.0 p.c. from \$2.52 to \$2.67 in 1967. Increases of 23 cents (7.8 p.c.) in mining and 25 cents (7.9 p.c.) in construction were smaller than the 1967 gains of 32 cents (12.2 p.c.) and 25 cents (8.6 p.c.), respectively in 1967. With the exception of mining where average weekly wages rose 8.4 p.c. (\$10.15) in comparison to an 11.9 p.c. (\$12.86) increase in 1967, all divisions showed a greater increase in 1968 than in 1967. The largest increase in average weekly wages was in the durables component of manufacturing which showed an 8.5 p.c. rise from \$108.40 to \$117.59. Increases in average weekly hours of 0.1 hours in manufacturing and 0.3 hours in mining were recorded. The non-durables component showed little change. There was a slight decrease of 0.1 hours in construction.

PRAIRIE REGION

Of all the regions, the Prairies showed the largest percentage increases in average hourly earnings during 1968 in all divisions except mining. Gains of 20 cents (8.7 p.c.) in manufacturing, and 17 cents (7.5 p.c.) in non-durables were smaller than rises of 9.0 p.c. and 9.7 p.c. in these components, respectively in 1967. The largest increases were recorded in durables, 23 cents (9.8 p.c.) and in construction, 31 cents (11.0 p.c.). With the exception of the non-durables components, all industries recorded a larger increase in average weekly wages in comparison to 1967. Durables had the greatest gain, from \$94.56 to \$103.31 (9.3 p.c.) as compared to a rise of \$6.17 from \$88.39 (7.0 p.c.) in 1967. Average weekly hours were lower in all industrial divisions. The declines ranged from 0.1 hours in manufacturing to 0.7 hours in construction.

BRITISH COLUMBIA

From 1967 to 1968 all industry divisions with the exception of durables recorded smaller increases in average hourly earnings than in 1967. In durables a gain of 24 cents (8.0 p.c.) was about the same as the rise of 22 cents (7.9 p.c.) in 1967. The smallest increase was recorded in construction, 3 cents (0.7 p.c.) compared with 32 cents (8.0 p.c.) in 1967. Increases in average weekly wages in 1968 were smaller than those in 1967 in all industrial divisions. Average weekly wages declined in the construction industry by \$6.88 to \$161.21 (4.1 p.c.), partly as a result of a decline and average weekly hours of 1.9 hours. Also, a reduction in the number of wage-earners reported in the engineering component where earnings are above the industry average contributed to the decrease. Average weekly hours stayed constant in the manufacturing industry at 37.7 hours and a slight rise of 0.1 hours was recorded in mining.

TABLE 1. Summary Statistics of Average Hours and Average Earnings of Hourly-rated Wage-earners

Industry division and area	Average weekly hours			Average hourly earnings			Average weekly wages

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1967 was 68.6 per cent of all manufacturing employees reported in the Employment Section's survey. In mining the hourly paid wage-earners represented 68.2 p.c. of reported employment and in construction 80.0 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

Wage-earners are defined as those employees engaged in actual production and related operations, including working foremen doing work similar to that of the employees they supervise. Also included are maintenance, warehouse and delivery staffs, routemen, driver-salesmen, sales clerks in retail stores, waitresses, etc.

Wage-earners not receiving pay for anytime during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or they draw pay from their employers (e.g. vacation pay). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuations in the series.

Man-hours

The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked. Premium or penalty hours credited for purposes of computing overtime payments are excluded. Hours credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked.

Wages

The wages of reported wage-earners are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are straight-time wages, over-time wages, cost-of-living allowances, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The wages concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, or other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the wages data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated each month show the numbers of wage-earners, their hours and their wages for the current and preceding month. The statistics first published for each month are preliminary; retabulation of the data in the succeeding month permits incorporation of corrections, retroactive pay for one month and data received too late for inclusion in the first tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages and aggregates are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", DBS Catalogue No. 12-501. The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few classes not found in the S.I.C. These include:

Durable-goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products.

Non-durable goods manufacturing - The sum of the remaining manufacturing industries.

Building - The sum of general contractors and special trade contractors.

Engineering - The sum of highways, bridges and streets and other construction.

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly, Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas are based on a labour market concept; the areas usually include a main centre and surrounding territory. A list showing the territory included in each tabulated urban area is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain construction establishments is included in the provincial totals but is not assigned to an urban centre.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the total number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages by total weekly hours. Average weekly wages are obtained by dividing total weekly wages by the total number of wage-earners. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-502 - Labour Income, 1926-58 - Price 75 cents

(A complete record of annual estimates of labour income from 1926, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial division, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50

(Estimates of selected employer labour Costs, by industry group and area - Report prepared jointly by Labour Division of Dominion Bureau of Statistics and Economics and Research Branch of the Canada Department of Labour).

SYMBOLS

- .. Figures not available.
- Nil or zero.
- Amount too small to be expressed.

In addition to the selected publications listed above, the Dominion Bureau of Statistics publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from the Dominion Bureau of Statistics, Ottawa 3.

REVIEW OF MAN-HOURS AND HOURLY EARNINGS, 1967-69

Introduction

Statistics in this report are based on the results of monthly survey of employment, payrolls and man-hours which are published in the monthly DBS publication "Man-hours and Hourly Earnings" (catalogue number 72-003). The annual averages, are 'weighted' in the sense that they are derived by an aggregation of payroll and hours figures for the twelve months and not by adding together the monthly averages. Explanatory notes at the end of this publication describe concepts, definitions, classification and coverage.

Industry Divisions

Manufacturing

Average hourly earnings of hourly-rated wage-earners in manufacturing rose by 21 cents from \$2.58 in 1968 to \$2.79 in 1969 - an increase of 8.1 per cent. The trend towards higher average hourly earnings was continuously sustained throughout the 60's as each consecutive year higher levels were reached. Both the durable and the non-durable goods components contributed to this 21-cent increase in 1969 with non-durables increasing by 20 cents and the durable component rising by 21 cents. As compared to 1968, average weekly hours in 1969 were lower 0.3 hours and average weekly wages higher by \$7.72, reaching 40.0 hours and \$111.72 respectively.

In durables, higher than the 1968 increases in average hourly earnings were reported in metal fabricating, (8.4 per cent) wood products (8.5 per cent) and electrical products (7.6 per cent). Primary metals maintained the 19 cents rise of previous year whereas the increase in transportation equipment dropped from 27 cents (9.6 per cent) in 1968 to 23 cents (7.5 per cent) in 1969. Average weekly hours were down in all industries shown except electrical products where there was no change. Average weekly wages were higher in all industries in the durables category with increases ranging from \$6.50 in wood products to \$9.01 in metal fabricating. All component industries recorded smaller aggregate increases during 1969 than during 1968 except metal fabricating where the reverse occurred.

In non-durables, over-the-year increases in average hourly earnings were 25 cents (8.3 per cent) in paper products; 18 cents (7.9 per cent) in food and beverages; 17 cents (8.3 per cent) in textiles and 14 cents (8.1 per cent) in clothing. Average weekly hours recorded small declines in all industry groups whereas average weekly wages showed higher levels. The largest increase in average weekly wages occurred in paper products (\$10.06). The clothing industry recorded the smallest increase (\$4.82) during 1969.

Mining

In mining, average weekly wages advanced 6.0 per cent from \$128.28 in 1968 to \$135.94 in 1969. This increase resulted from higher average hourly earnings which showed a gain of 6.8 per cent (21 cents) over-the-year. There was a small decrease (0.1 hours) in average weekly hours. Metals registered an 18-cent (5.6 per cent) increase in average hourly earnings and a 4.6 per cent rise in average weekly wages as average weekly hours were down from 41.2 hours in 1968 to 40.7 hours in 1969. Average weekly wages in non-metals, except fuels, were up 6.4 per cent as a result of 7.7 per cent increase in average hourly earnings. Average weekly hours, on the other hand, declined 1.2 per cent to 41.9 hours in 1969 from 42.4 in 1968. Services incidental to mining recorded a 24-cent (7.2 per cent) increase in average hourly earnings when average weekly hours declined 1.6 per cent. The gain in average weekly wages was 5.3 per cent reaching \$150.34 in 1969.

Construction

Over-the-year, average hourly earnings in construction moved upward to reach the level of \$3.71 from \$3.33 recorded in 1968 - an 11.4 per cent increase. Average weekly hours were down 0.7 hours (1.7 per cent) and average weekly wages rose \$12.84 (9.5 per cent) in 1969. A much smaller increase in average weekly wages was recorded during the preceding year (4.7 per cent).

In building, average weekly hours were at 38.0 hours, down 0.6 hours from 1968. Average weekly wages climbed \$13.35 (10.1 per cent), nearly double the previous year's increase of \$7.42. Average hourly earnings also experienced a greater than 1968 increase, 11.7 per cent (40 cents) as compared to 7.9 per cent (25 cents). Highways, bridges and streets, a component of engineering construction, recorded 34 cents (12.9 per cent) increase in average hourly earnings and \$14.75 (12.2 per cent) rise in average weekly wages. Compared to the annual increase registered during 1968 for engineering (\$3.77), the 1969 increase (\$12.23) in average weekly wages was considerably larger. Declines in averages weekly hours occurred in both 'special trade contractors' and 'other engineering'.

Regions

Atlantic Region

In manufacturing, average hourly earnings were 7.7 per cent higher than 1968 representing an increase of 16 cents as compared to 10 cents recorded in the preceding year. Average weekly hours dropped slightly and average weekly wages advanced \$6.39, nearly double the increase of 1968 (\$3.65). Similar trends were observed in both mining and construction, i.e. lower average weekly hours, higher average hourly earnings and average weekly wages. The rise in average weekly wages amounted to \$3.21 and \$17.72 in mining and construction respectively.

Quebec

Average hourly earnings in manufacturing were up 7.3 per cent from \$2.71 in 1968 to \$2.93 in 1969. The small decline (0.2 hours) in average weekly hours slightly offset the growth of average hourly earnings, but the resultant increase of \$6.74 in average weekly wages was still higher than that of previous year when average weekly wages gained \$6.52. In construction, increases in average weekly wages in both the components were larger than the comparable 1968 increases. Average weekly hours in construction were lower by 0.5 hours and average hourly earnings higher by 6.4 per cent (22 cents). Mining also experienced a reduction in hours (0.2 hours) and increases in average hourly earnings (5.9 per cent) and in average weekly wages (5.3 per cent).

Ontario

In 1969 manufacturing recorded gains of 8.1 per cent (22 cents) in average hourly earnings and 7.4 per cent (\$8.08) in average weekly wages. The comparable increases in 1968 were 7.5 per cent (19 cents) and 7.7 per cent (\$7.30) respectively. Average hourly earnings in construction advanced 41 cents (12.1 per cent) reaching the level of \$3.81 from \$3.40 recorded in 1968. Average weekly wages climbed \$12.58 as compared to the \$10.00 increase recorded in 1968. Average weekly hours were lower in both the building and engineering components. The mining industry followed the pattern observed in manufacturing and construction as higher average weekly wages resulted from increased average hourly earnings offsetting a small drop in weekly average of hours. The increases, however, were lower than those recorded in 1968.

Prairie Region

An 8.3 per cent increase in average weekly wages occurred in manufacturing. The level of \$106.94 reached in 1969 was generated by an 8.0 per cent increase in average hourly earnings, from \$2.51 in 1968 to \$2.71 in 1969. At the industry division level, average weekly hours in manufacturing were unchanged at the 1968 average of 39.4 hours. Average hourly earnings in construction rose by 36 cents (11.5 per cent) as compared to 31 cents (11.0 per cent) in 1968. Average weekly hours fell by 0.3 hours in mining, average weekly wages advanced \$8.31 (6.0 per cent) from \$138.53 recorded in 1968. Average hourly earnings gained 21 cents (6.2 per cent) to reach \$3.58 in 1969. These increases were lower than the 1968 increases of \$9.22 in average weekly wages and 24 cents in average hourly earnings.

British Columbia

Manufacturing reached the level of \$3.48 in average hourly earnings and \$130.27 in average weekly wages - higher than 1968 by 7.7 per cent and 7.1 per cent respectively. Average weekly hours declined to 37.4 hours from 37.7 hours in 1968. Average weekly wages in mining advanced \$9.06 (6.2 per cent) from \$147.25 recorded in 1968, as a result of a 8.3 per cent rise in average hourly earnings. Average weekly hours were down 0.8 hours from 40.7 hours average for 1968. Construction displayed a strong trend towards higher average hourly earnings as a 68 cent (15.7 per cent) increase from the 1968 level of \$4.33 was recorded. Average weekly wages climbed by \$20.47 (12.7 per cent) to reach \$181.68 in 1968. Average weekly hours were 0.8 hours lower than 1968.

TABLE 1. Summary Statistics of Average Hours and Average Earnings of Hourly-rated Wage-earners

Industry division and area	Average weekly hours			Average hourly earnings			Average weekly wages

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-paid wage-earners on the average in 1969 was 68.9 p.c. of all manufacturing employees reported in the Employment Section's survey. In mining the hourly paid wage-earners represented 66.3 p.c. of reported employment and in construction 78.7 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

Wage-earners are defined as those employees engaged in actual production and related operations including working foremen doing work similar to that of the employees they supervise. Also included maintenance, warehouse and delivery staffs, routemen, driver-salesmen, sales clerks in retail stores, waitresses, etc.

Wage-earners not receiving pay for anytime during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or they draw pay from their employers (e.g. vacation pay). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuations in the series.

Man-hours

The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked. Premium or penalty hours credited for purposes of computing overtime payments are excluded. Hours credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked.

Wages

The wages of reported wage-earners are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are straight-time wages, over-time wages, cost-of-living allowances, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The wages concept does not include supplementary labour costs, operational costs or payments related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, or other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the wages data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated each month show the numbers of wage-earners, their hours and their wages. The statistics first published for each month are advance which are retabulated to appear in the subsequent month as preliminary data and in the month following as revised or final data. The retabulation of data in the two succeeding months permits incorporation of corrections, retroactive pay and data received late for inclusion in the advance and preliminary stages of tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages and aggregates are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", DBS Catalogue No. 12-501. The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few classes not found in the S.I.C. These include:

Durable-goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products.

Non-durable goods manufacturing - The sum of the remaining manufacturing industries.

Building - The sum of general contractors and special trade contractors.

Engineering - The sum of highways, bridges and streets and other construction.

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly, Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas are based on a labour market concept; the areas usually include a main centre and surrounding territory. A list showing the territory included in each tabulated urban area is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain construction establishments is included in the provincial totals but is not assigned to an urban centre.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the total number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages by total weekly hours. Average weekly wages are obtained by dividing total weekly wages by the total number of wage-earners. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, average of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals from 1954).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$2.00 per year

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-508 - Estimates of Employees by Province and Industry, 1961-68 Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial division, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-206 - Seasonally adjusted Employment Indexes - January 1961 - December 1970 - Price \$2.00

(Industry and area index numbers of employment unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-510 - Labour Costs in Manufacturing 1968 - Price \$1.50

72-511 - Labour Costs in Mines, Quarries and Oil Wells 1969 - Price \$1.50

(Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Canada Department of Labour).

REVIEW OF MAN-HOURS AND HOURLY EARNINGS
1968-70

Introduction

Statistics in this report are based on the results of monthly surveys of employment, payrolls and manhours published in the publication "Man-hours and Hourly Earnings"(1) (Catalogue No. 72-003). The annual averages are weighted in the sense that they are derived from an aggregation of payroll and hours figures for the twelve months and not by adding together the monthly averages. Data in this publication relate to hourly rated wage-earners in the mining, manufacturing and construction industries only. Technical notes at the end of this publication describe concepts, definitions, classification and coverage.

Commentary

The pattern generally observed in the past continued during 1970 with gains in average hourly earnings more than offsetting the effect of small declines in average weekly hours, and resulting in an upward movement in average weekly wages. At the Canada level, annual changes in earnings and hours in manufacturing were almost identical to those recorded in 1969. The primary metals component of durable goods manufacturing recorded increases in average hourly earnings considerably larger than the previous year due to wage increases following settlement of industrial disputes in the latter part of 1969 and the middle of 1970. Increased bonus payments as well as overtime payments also contributed to these gains. In 1970, average weekly wages and average hourly earnings in mining registered increases more than twice as large as in 1969. This was the consequence of industrial disputes which occurred during 1969, thereby depressing average earnings in that year and resulting in unusually large increase in 1970. The effect was relatively stronger in the Atlantic Region and Ontario where both average hourly earnings and average weekly wages showed larger percentage changes than the averages for Canada. In the construction industry, a combination of factors during 1970 - more hours worked by relatively higher paid wage-earners, increased overtime payments in some months, wage increases, etc. generated gains in average hourly earnings larger than in 1969. The advance was largest in the Atlantic Region and smallest in British Columbia.

(1) This publication and "Employment and Average Weekly Wages and Salaries" (Cat. No. 72-002) have now been combined into one, entitled "Employment, Earnings and Hours", catalogue No. 72-002.

NOTES

Each month the Employment Section collects from its reporting units data on the number of paid employees and their payrolls, on the number of wage-earners for whom a record of hours is kept and their hours and earnings, and on the number of female employees. The data on total numbers of employees, their average weekly wages and salaries and on female employees are released in a monthly report "Employment and Average Weekly Wages and Salaries", Catalogue No. 72-002. The data relate to a reference period, conceptually the last seven days of the month. In a monthly tabulation, data are grouped into industry and area units.

The Reporting Unit

The reporting unit is the establishment, that is, the smallest industrial unit which is a separate operating entity capable of reporting all elements of basic industrial statistics including information on inputs and outputs needed to calculate "value added" or "gross mark-up" or "gross profit" as well as the related data on employment and payrolls. For purposes of urban area statistics, the Employment Section may request separate reports from parts of an establishment located in different urban centres.

Monthly reports are requested from establishments in the following industrial divisions: forestry; mining, including milling; manufacturing; construction; transportation, communication and other utilities; trade; finance, insurance and real estate; and service. The Employment Section does not have wage-earner data for all these divisions. In some industries there are relatively few wage-earners. In others the earnings are not related to their hours as is the case of monthly paid wage-earners or employers who do not keep a record of man-hours. For these reasons data on wage-earners are currently available for mining, manufacturing, construction and for the following industries in other divisions: urban transit, highway and bridge maintenance, laundries, cleaners and pressers and hotels, restaurants and taverns.

The survey covers larger firms, that is, firms having 20 or more employees in any month of the year. Thus all the establishments of a firm that had 20 or more employees, in total, in any month of the year would be included even though any particular establishment had only a few employees. This size criteria results in approximately the same coverage as did the "usually employing 15 or more" concept that was formerly used.

It is important to emphasize that the statistics in the report do not represent estimates of total numbers of wage-earners in specified industries or areas, but show only certain wage-earners on the staffs of co-operating employers in the reference period. In manufacturing the number of hourly-rated wage-earners on the average in 1969 was 68.9 p.c. of all manufacturing employees reported in the Employment Section's survey. In mining the hourly paid wage-earners represented 66.3 p.c. of reported employment and in construction 78.7 p.c.

Definitions

Reference Period

The figures refer to the last seven days in the specified months. In practice, few establishments keep payroll records covering precisely this period and establishments are therefore permitted to report for their last pay period or pay periods in each month.

When the reported pay period is longer than one week, the payroll data are reduced to one week's proportion of the totals. The numerators of the fractions used in calculating these weekly equivalents are 5, 6 or 7 depending on the number of days per week in which the establishment operated in the pay period. The denominators of the fractions are the number of working days in the different pay periods. When a holiday, lay-off or industrial dispute occurs in an establishment that reports a pay period other than the last week of the month an adjustment is made to the data if the holiday, lay-off or dispute affects the two periods differently.

Wage-earners

The survey covers the wage-earners of the reporting establishments for whom a record of hours is kept except for casuals working less than the equivalent of one day a week and wage-earners paid at a monthly rate. Regular part-time wage-earners are included as are certain workers whose earnings are not solely based on hours worked such as piece-workers in establishments that keep a record of hours.

Wage-earners are defined as those employees engaged in actual production and related operations, including working foremen doing work similar to that of the employees they supervise. Also included are maintenance, warehouse and delivery staffs, routemen, driver-salesmen, sales clerks in retail stores, waitresses, etc.

Wage-earners not receiving pay for anytime during the reference period are excluded. For example, workers on strike during the reported pay period, or laid off as a consequence of a strike, are not included in the data unless they work part of the week or they draw pay from their employers (e.g. vacation pay). The exclusion of persons affected by industrial dispute is one of the main sources of irregular fluctuations in the series.

Man-hours

The man-hours statistics include hours worked by full-time and part-time wage-earners, including overtime hours actually worked. Premium or penalty hours credited for purposes of computing overtime payments are excluded. Hours credited to wage-earners absent on leave with pay in the reported pay periods are included in the statistics as though the hours had been worked.

Wages

The wages of reported wage-earners are covered. These are gross payments before deductions are made for taxes, unemployment insurance, etc. Included are straight-time wages, over-time wages, cost-of-living allowances, payments to persons absent because of holidays, vacations, sickness, etc., and regularly paid incentive, production and shift bonuses.

The wages concept does not include supplementary labour costs, operational costs or payments not related to the reference period. Thus the data do not include such items as employer's contributions to unemployment insurance, medical plans, workmen's compensation, or other welfare plans, the value of room and board, compensation in kind, travelling expenses, retirement gratuities, or bonuses paid at irregular or infrequent intervals. The treatment of vacation stamps is an exception. Although payment of vacation stamps does not relate to the reference period, these payments are included in the wages data and the employees are considered to be absent without pay during the period they are on vacation.

Organization of Data

The Tabulation

Data tabulated each month show the numbers of wage-earners, their hours and their wages. The statistics first published for each month are advance which are retabulated to appear in the subsequent month as preliminary data and in the month following as revised or final data. The retabulation of data in the two succeeding months permits incorporation of corrections, retroactive pay and data received late for inclusion in the advance and preliminary stages of tabulation. Data tabulated but not published are available on request provided the secrecy requirements of the Statistics Act are met.

The data are classified by industrial and geographic units and various averages and aggregates are calculated.

Industrial Classification

All reporting establishments are assigned to an industrial class on the basis of their principal activity. If an establishment is engaged in a number of different industrial activities, its principal activity is determined by the net value added by these activities or, where this is not possible, by the gross revenue obtained from the different activities. When an establishment has very mixed activities, it is not necessarily shifted from industry to industry each time its principal activity changes.

A description of the various industries and groups of industries may be found in the "Standard Industrial Classification Manual", DBS Catalogue No. 12-501. The "S.I.C. code" columns in the main tables refer to this manual. The tables contain a few classes not found in the S.I.C. These include:

Durable-goods manufacturing - The sum of wood products, furniture and fixtures, primary metal industries, metal fabricating industries, machinery (except electrical), transportation equipment, electrical products, and non-metallic mineral products.

Non-durable goods manufacturing - The sum of the remaining manufacturing industries.

Building - The sum of general contractors and special trade contractors.

Engineering - The sum of highways, bridges and streets and other construction.

As well, the tables subdivide the synthetic textile industry into filament yarn and staple fibres and spun yarn and fabrics.

Geographic Classification

Reporting establishments are assigned to a province and, where applicable, to an urban area. Newfoundland, Prince Edward Island, Nova Scotia and New Brunswick are added together in some tables to give a figure for the Atlantic Region. Similarly, Manitoba, Saskatchewan and Alberta are added together to give a figure for the Prairie Region. Establishments in the Yukon and Northwest Territories are excluded from provincial totals but are included in the Canada totals. For urban areas the Census of Population's "Metropolitan Area" definitions were used for the seventeen urban areas where they apply. The definitions used for other urban areas are based on a labour market concept; the areas usually include a main centre and surrounding territory. A list showing the territory included in each tabulated urban area is available from the Employment Section on request.

An establishment not located in a tabulated urban area or an establishment that has no fixed location such as certain construction establishments is included in the provincial totals but is not assigned to an urban centre.

Averages

The average weekly hours figure is obtained by dividing total weekly man-hours by the total number of wage-earners who worked those hours. Average hourly earnings are obtained by dividing total weekly wages by total weekly hours. Average weekly wages are obtained by dividing total weekly wages by the total number of wage-earners. It should be noted that total hours include overtime hours actually worked and that the wage-earner total includes part-time wage-earners and casuals working more than the equivalent of one day a week. Annual statistics are calculated from the aggregate of the monthly data, not from monthly averages.

NOV 16 1982
